FOR FURTHER INFORMATION CONTACT: Kate Swails or Tammy Adams, (301)713-2289.

SUPPLEMENTARY INFORMATION: On February 15, 2007, notice was published in the **Federal Register** (72 FR 7419) that an amendment of Permit No. 984-1814, issued June 21, 2006 (71 FR 37060), had been requested by the above-named individual. The requested amendment has been granted under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

Permit No. 984-1814 authorized the permit holder to capture up to 20 adult Weddell seals (*Leptonychotes weddellii*) and disturb up to 30 adult and 10 juvenile seals annually in McMurdo Sound, Antarctica. The animals have a data logger/video system attached, muscle biopsies and blood samples collected, and blubber thickness measured. The permit also authorizes up to 3 research-related mortalities per year. The amendment changes the field season for this project from five August to December field seasons over 5 years to three back to back field seasons over the course of two research years. Researchers will capture 50 Weddell seals annually for 2 years instead of 20 annually over the course of 5 years. Researchers will attach data logger/video systems to 24 adult seals and another 24 seals will have time-depth recorders attached annually. Researchers will measure metabolic rates of all captured seals using open-flow respirometry.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), a final determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Dated: April 5, 2007.

P. Michael Payne,

Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service.
