

After consulting with ODFW, it was determined that in order for anglers to have the opportunity to achieve the overall Central Coast subarea allocation, with little risk of the subarea or coastwide allocation being exceeded, additional fishing dates are warranted. Therefore, through this action, NMFS is announcing fishing dates in August, September, and October that were not previously implemented in the final rule on April 11, 2023 (88 FR 21503) or through inseason action implemented on June 2, 2023 (88 FR 36973).

Notice of these additional fishing dates will also be announced on the NMFS hotline at 206–526–6667 or 800–662–9825.

Classification

NMFS issues this action pursuant to the Northern Pacific Halibut Act of 1982. This action is taken under the regulatory authority at 50 CFR 300.63(c)(6), and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(3)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment would be impracticable and contrary to the public interest. WDFW and ODFW provided updated landings data to NMFS on June 23, 2023, showing that through June 18, fishery participants in the recreational fishery off of Washington had caught only 44 percent of the Puget Sound subarea allocation, 42 percent of the North Coast subarea allocation, and 67 percent of the South Coast subarea allocation; fishery participants in the Columbia River subarea had caught only 65 percent of the subarea allocation; and fishery participants in the recreational fishery off of Oregon had caught only 36 percent of Central Coast subarea allocation. NMFS uses fishing rates from previous years to determine the number of recreational fishing dates needed to attain subarea allocations. Given the lower than expected catch rates in the Washington Puget Sound, North Coast, and South Coast subareas; the Columbia River subarea; and the Oregon Central Coast subarea, additional dates are considered necessary to increase angler opportunity to reach the overall Washington and Oregon subarea allocations. This action should be implemented as soon as possible to allow fishery participants to take advantage of the additional season dates. As the fisheries close on September 30, 2023 in Washington and the Columbia River subareas and on October 31, 2023 in Oregon, implementing this action through proposed and final rulemaking would

limit the benefit this action would provide to fishery participants. Without implementation of additional season dates in the Washington Puget Sound, North Coast, and South Coast subareas, the Columbia River subarea, and the Oregon Central Coast, the overall Washington and Oregon allocations are unlikely to be harvested, limiting economic benefits to the participants and not meeting the goals of the Catch Sharing Plan. It is necessary that this rulemaking be implemented in a timely manner so that planning for additional season dates can take place, and for business and personal decision making by the regulated public impacted by this action, which includes recreational charter fishing operations, associated port businesses, and private anglers who do not live near the coastal access points for this fishery, among others. To ensure the regulated public is fully aware of this action, notice of this regulatory action will also be provided to anglers through a telephone hotline, news release, and by the relevant state fish and wildlife agencies. NMFS will receive public comments for 15 days after publication of this action, in accordance with 50 CFR 300.63(c)(6)(iv). No aspect of this action is controversial, and changes of this nature were anticipated in the process described in regulations at 50 CFR 300.63(c).

For the reasons discussed above, there is also good cause under 5 U.S.C. 553(d)(3) to waive the 30-day delay in effective date and make this action effective immediately upon filing for public inspection, as a delay in effectiveness of this action would constrain fishing opportunity and be inconsistent with the goals of the Catch Sharing Plan, as well as potentially limit the economic opportunity intended by this rule to the associated fishing communities. This inseason action is not expected to result in exceeding the allocation for these subareas. NMFS regulations allow the Regional Administrator to modify sport fishing periods, bag limits, size limits, days per calendar week, and subarea allocations, provided that the action allows allocation objectives to be met and will not result in exceeding the catch limit for the subarea. NMFS recently received information on the progress of landings in the recreational fisheries in Washington and Oregon subareas, indicating additional season dates for Washington and Oregon should be implemented in the fishery to ensure optimal harvest of the subarea allocations. As stated above, it is in the public interest that this action is not

delayed, because a delay in the effectiveness of these new dates would not allow the allocation objectives of the recreational Pacific halibut fishery to be met.

Authority: 16 U.S.C. 773–773k.

Dated: July 17, 2023.

Jennifer M. Wallace,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 230224–0053; RTID 0648–XD154]

Fisheries of the Exclusive Economic Zone off Alaska; Pacific Cod By Catcher/Processors Using Trawl Gear in the Central Regulatory Area of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is prohibiting retention of Pacific cod by catcher/processors using trawl gear in the Central Regulatory Area of the Gulf of Alaska (GOA). This action is necessary because the 2023 total allowable catch of Pacific cod allocated to catcher/processors using trawl gear in the Central Regulatory Area of the GOA has been reached.

DATES: Effective 1200 hours, Alaska local time (A.l.t.), July 18, 2023, through 2400 hours, A.l.t., December 31, 2023.

FOR FURTHER INFORMATION CONTACT: Obren Davis, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2023 total allowable catch (TAC) of Pacific cod allocated to catcher/processors using trawl gear in the Central Regulatory Area of the GOA is

462 metric tons as established by the final 2023 and 2024 harvest specifications for groundfish of the GOA (88 FR 13238, March 2, 2023).

In accordance with § 679.20(d)(2), the Administrator, Alaska Region, NMFS (Regional Administrator), has determined that the 2023 TAC of Pacific cod allocated to catcher/processors using trawl gear in the Central Regulatory Area of the GOA has been reached. Therefore, NMFS is requiring that Pacific cod caught by catcher/processors using trawl gear in the Central Regulatory Area of the GOA be treated as prohibited species in accordance with § 679.21(a)(2).

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR part 679, which was issued pursuant to section 304(b), and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment would be impracticable and contrary to the public interest, as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay prohibiting the retention of Pacific cod by catcher/processors using trawl gear in the Central Regulatory Area of the GOA. NMFS was unable to publish a notice

providing time for public comment because the most recent, relevant data only became available as of July 17, 2023.

The Assistant Administrator for Fisheries, NOAA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.
