

Serve America. In 2004, the Corporation plans to establish specific nomination guidelines for each of the programs and develop a formal nomination process, which involves voluntary information collection from non-government individuals.

Prior to 2003, AmeriCorps recognized its outstanding members annually through the All-AmeriCorps Awards, which were initiated in 1999 and presented by President Clinton as part of the 5th anniversary celebration of the program. Senior Corps had recognized its outstanding projects and volunteers at its own national conference, and Learn and Serve America recognized exemplary programs and participants through its Leaders School selection and the President's Student Service Awards.

SUPPLEMENTARY INFORMATION:

A. Purpose

Presolicitation notices are used by the Government for several reasons, one of which is to aid prospective contractors in submitting proposals without undue expenditure of effort, time, and money. The Government also uses the presolicitation notices to control printing and mailing costs. The presolicitation notice response is used to determine the number of solicitation documents needed and to assure that interested offerors receive the solicitation documents. The responses are placed in the contract file and referred to when solicitation documents are ready for mailing. After mailing, the responses remain in the contract file and become a matter of record.

Respondents: 5,310.

Responses Per Respondent: 8.

Total Responses: 42,480.

Hours Per Response: .167.

SUPPLEMENTARY INFORMATION:

A. Purpose

This information collection complies with Section 6002 of the Resource Conservation and Recovery Act (RCRA) (42 U.S.C. 6962). RCRA requires the Environmental Protection Agency (EPA) to designate items which are or can be produced with recovered materials. RCRA further requires agencies to develop affirmative procurement programs to ensure that items composed of recovered materials will be purchased

to the maximum extent practicable. Affirmative procurement programs required under RCRA must contain, as a minimum (1) a recovered materials preference program and an agency promotion program for the preference program; (2) a program for requiring estimates of the total percentage of recovered materials used in the performance of a contract, certification of minimum recovered material content actually used, where appropriate, and reasonable verification procedures for estimates and certifications; and (3) annual review and monitoring of the effectiveness of an agency's affirmative procurement program.

The items for which EPA has designated minimum recovered material content standards are (1) cement and concrete containing fly ash, (2) paper and paper products, (3) lubricating oil containing re-refined oil, (4) retread tires, and (5) building insulation products. The FAR rule also permits agencies to obtain pre-award information from offerors regarding the content of items which the agency has designated as requiring minimum percentages of recovered materials. There are presently no known agency designated items.

In accordance with RCRA, the information collection applies to acquisitions requiring minimum percentages of recovered materials, when the price of the item exceeds \$10,000 or when the aggregate amount paid for the item or functionally equivalent items in the preceding fiscal year was \$10,000 or more.

Contracting officers use the information to verify offeror/contractor compliance with solicitation and contract requirements regarding the use of recovered materials. Additionally, agencies use the information in the annual review and monitoring of the effectiveness of the affirmative procurement programs required by RCRA.
