Pursuant to Title 49 Code of Federal Regulations (CFR) Part 235 and 49 U.S.C. 20502(a), the following railroad has petitioned the Federal Railroad Administration (FRA) seeking approval for the discontinuance or modification of the signal system or relief from the requirements of 49 CFR part 236 as detailed below.

Applicant: CSX Transportation, Incorporated, Mr. C. M. King, Chief Engineer, Communications and Signals, 500 Water Street, SC J-350, Jacksonville, Florida 32202.

CSX Transportation, Incorporated (CSXT) seeks approval of the proposed modification of the traffic control system on the yard track at Milepost 293.00 near Florence, South Carolina, on the Florence Division, Charleston Subdivision. The proposed changes consist of a reduction of the limits of the control point, including: conversion of the Number 5 power-operated switch to hand operation, removal of associated controlled signals S3 and N3, and installation of the new controlled signal SE1 to govern movements over the Number 3 power-operated switch.

The reason given for the proposed changes is that present day operation does not warrant retention of the power-operated switch.

Any interested party desiring to protest the granting of an application shall set forth specifically the grounds upon which the protest is made, and include a concise statement of the interest of the party in the proceeding. Additionally, one copy of the protest shall be furnished to the applicant at the address listed above.

FRA expects to be able to determine these matters without a public hearing. However, if a specific request for an oral hearing is accompanied by a showing that the party is unable to adequately
