SUPPLEMENTARY INFORMATION:

DHS invites the general public to comment on the new information collection forms, as described below.

Interested parties can obtain copies of the Forms Package by calling or writing the point of contact listed above.

The Department of Homeland Security (DHS) Small Business Innovation Research (SBIR) program established under the Small Business Innovation Development Act of 1982 (Pub. L. 97-219) is responsible for collecting information used by the DHS SBIR/Small Business Technology Transfer (STTR) Program Office to: 1. Identify members of the public who qualify for, and are interested in participating in, the DHS SBIR/STTR Program; 2. Facilitate SBIR/STTR outreach to the public; 3. Provide the DHS SBIR/STTR Program Office necessary and sufficient information to determine that proposals submitted by the public to the DHS SBIR/STTR Program meet criteria for consideration under the program.

Please note that the Forms Package includes nine forms for collecting proposal information from small businesses. As explained herein, these separate forms are intended to reduce burden and improve records management by (1) allowing offerors to submit identifying information only once and then to reference that previously submitted identifying information in the submittal of proposals, (2) eliminating the cost and delay associated with the submission of proposals via non-electronic means, (3) facilitating timely review of proposals, and (4) improving the accuracy of records management for proposals. The Department is committed to improving its SBIR processes and urges all interested parties to suggest how these materials can further reduce burden while seeking necessary information under the Act.

DHS is particularly interested in comments that:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Suggest ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Suggest ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
