SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060-0207.

Title: Part 11 "Emergency Alert System (EAS).

Form No.: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit, not for-profit institutions.

Number of Respondents: 22,000 respondents; 1,144,000 responses.

Estimated Time Per Response: .017—40 hours.

Frequency of Response: On occasion reporting requirement and recordkeeping requirement.

Total Annual Burden: 38,585 hours.

Total Annual Cost: \$8,250,000.

Needs and Uses: On February 22, 2002, the Commission adopted a *Report and Order* in EB Docket No. 01-66 (67 FR 18502). This *Report and Order* amended Part 11 rules to revise the technical and operational requirements for the Emergency Alert System (EAS). Many of these amendments were intended to enhance the capabilities and performance of the EAS during state and local emergencies, which will promote public safety. This *Report and Order* amended the EAS rules to make compliance with the EAS requirements less burdensome for broadcast stations, cable systems and wireless cable systems. The *Report and Order* also eliminated rules that were obsolete or no longer needed.

Part 11 contains rules and regulations providing for an EAS. The EAS provides the President with the capability to provide immediate communications and information to the general public at the national, state and local area level during periods of national emergency. The EAS also provides state and local government and the National Weather Service with the capability to provide immediate communications and information to the general public concerning emergency situations posing a threat to life and property.

Part 11 describes the required technical standards and operational

procedures of the EAS for AM, FM and TV broadcast stations, cable systems, wireless cable systems and other participating entities and includes recordkeeping and reporting requirements.

The information will be used by FCC staff as part of routine inspections of broadcast stations. Accurate recordkeeping of this data is vital in determining the location and nature of possible equipment failure on the part of the transmitting or receiving entity. Furthermore, since the national level EAS is solely for the President's use, its proper operation must be assured.

Federal Communications Commission.

Deputy Secretary.
