NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

[NRC–2011–0088]

RIN 3150–AI97

Incorporation by Reference of American Society of Mechanical Engineers Codes and Code Cases; Correction

AGENCY: Nuclear Regulatory Commission.

ACTION: Correcting amendment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) published a final rule in the **Federal Register** on July 18, 2017, to incorporate by reference recent editions of and addenda to the American Society of Mechanical Engineers (ASME) Codes for nuclear power plants. The final rule contained a minor error when referring to a table related to certification requirements for non-destructive examination personnel. In addition, the final rule contained a minor error in a requirement for check valve monitoring. This document corrects the final rule by revising the section that contains these errors.

DATES: This correction is effective January 18, 2018.

SUPPLEMENTARY INFORMATION: The NRC published a final rule in the **Federal Register** on July 18, 2017 (82 FR 32934), to incorporate by reference recent editions of and addenda to the ASME Codes for nuclear power plants in chapter I of title 10 of the *Code of Federal Regulations* (10 CFR). The final rule contained a minor error when referring to a table related to certification requirements for non-destructive examination personnel. The final rule inadvertently prohibited the use of the entire appendix containing the table instead of prohibiting only the table and subarticle as intended. The final rule also contained a minor error in the requirement for check valve monitoring in 10 CFR 50.55a(b)(3)(iv) by referencing an incorrect edition of the ASME Code for Operation and Maintenance of Nuclear Power Plants (OM Code). In particular, the final rule amended 10 CFR 50.55a(b)(3)(iv) to state that licensees applying Appendix II, 1998 Edition through the 2012 Edition of the ASME OM Code shall satisfy the requirements of paragraphs (b)(3)(iv)(A), (B), and (D). This requirement should have applied only to the 1998 Edition through the 2002 Addenda of the ASME OM Code, because the remaining portion of 10 CFR 50.55a(b)(3)(iv) addresses the check valve provisions effective after the 2002 Addenda of the ASME OM Code. This document

corrects the final rule by revising the section that contains these errors.

Rulemaking Procedure

Under the Administrative Procedure Act (5 U.S.C. 553(b)), an agency may waive the normal notice and comment requirements if it finds, for good cause, that they are impracticable, unnecessary, or contrary to the public interest. As authorized by 5 U.S.C. 553(b)(3)(B), the NRC finds good cause to waive notice and opportunity for comment on this amendment because the corrections will have no substantive impact and are of a minor and administrative nature dealing with an error in a reference to a table in a document being incorporated by reference and an error when referring to a specific edition of the ASME OM Code.

As discussed in the statement of considerations on page 56826 of the proposed rule (80 FR 56820; September 18, 2015) and on page 32942 of the final rule (82 FR 32934; July 18, 2017), the NRC intended to prohibit the use of a table and subarticle with an accelerated training process for ultrasonic examination nondestructive examination personnel. The rule language inadvertently prohibited the use of the entire appendix, and this amendment corrects the error by prohibiting the use of the table and subarticle only.

As discussed in the statement of considerations on page 56832 of the proposed rule (80 FR 56820; September 18, 2015) and on page 32950 of the final rule (82 FR 32934; July 18, 2017), the NRC intended that a specific requirement for check valve monitoring in 10 CFR 50.55a(b)(3)(iv) apply only to the 1998 Edition through the 2002 Addenda of the ASME OM Code. The final rule inadvertently referenced the 2012 Edition of the ASME OM Code in this requirement rather than the 2002 Addenda. This amendment corrects the error by replacing “2012 Edition” with “2002 Addenda” in the second sentence of the introductory text of 10 CFR 50.55a(b)(3)(iv).

This amendment does not require action by any person or entity regulated by the NRC. Also, the final rule does not change the substantive responsibilities of any person or entity regulated by the NRC. Furthermore, for the reasons stated above, the NRC finds, pursuant to 5 U.S.C. 553(d)(3), that good cause

exists to make this rule effective upon publication of this notice.
