

be extended to the proposed Job Corps Center property parcel in accordance with all applicable building codes. This is not expected to create any significant impacts to the environment or to the regional utility infrastructure.

The major highway that connects the GWLHDC facility with nearby metropolitan cities is U.S. Highway 10, located east of the Carville property. No public transportation is available to or from the proposed Job Corps Center. Private bus transportation is available from the Greyhound Bus Company with a bus station located in St. Gabriel. Rail transportation is provided by Amtrak with a station located in Baton Rouge. Air transportation is provided by several commercial carriers, including American Eagle, Continental, Delta Northwest, and USAirways, at the Baton Rouge Metropolitan Airport. The construction of a new Job Corps Center will not have any significant impact on the regional transportation infrastructure.

No significant adverse affects to local medical, emergency, fire and police services are anticipated. The primary medical provider located closest to the proposed Job Corps parcel is the Baton Rouge General Medical Center, approximately 15 miles from the proposed Job Corps parcel. The Job Corps Center will have a small medical and dental facility on-site for use by the residents as necessary. Security services at the Job Corps will be provided by the center's security staff, with two (2) personnel on the day shift, three (3) on the evening shift, and two (2) on the night shift. Law enforcement services are provided by the Iberville Parish Sheriff Office Substation, located approximately 5 miles from the proposed project site. The local fire station is the East Iberville Fire Department located in St. Gabriel. The fire department consists of three (3) stations with approximately 35 volunteers. The GWLHDC has entered into a Memorandum of Agreement with the Iberville Volunteer Fire Department for all emergency services.

The proposed project will not have a significant adverse sociological affect on the surrounding community. Similarly, the proposed project will not have a significant adverse affect on demographic and socioeconomic characteristics of the area.

The alternatives considered in the preparation of this FONSI were as follows: (1) No Action; (2) Construction at an Alternate Site; and (3) Continue Construction as Proposed. The "No Action" alternative was not selected. The U.S. Department of Labor's goal of expanding the Job Corps Program by

establishing new Job Corps Center in under-served regions of the United States would not be met under this alternative. "Construction at an Alternate Site" was not selected because the Carville site was the only proposed facility in the State of Louisiana, and no alternative sites are available for construction within the State of Louisiana. Due to the suitability of the proposed site for establishment of a new Job Corps Center, and the absence of any identified significant adverse environmental impacts from locating a Job Corps Center on the subject property, the "Continue Construction as Proposed" alternative was selected.

Based on the information gathered during the preparation of the EA, no environmental liabilities, current or historical, were found to exist on the proposed Job Corps Center site. The construction of the Job Corps Center at the Gillis W. Long Hansen's Disease Center, 5445 Point Clair Road, in Carville, Iberville Parish, Louisiana will not create any significant adverse impacts on the environment.

Dated at Washington, DC, this 21st day of March, 2000.

Mary H. Silva,

Director of Job Corps.

[NAFTA-3415]

AMP, Inc., a Tyco International Ltd. Company, Fiber Optic Division, Middletown, Pennsylvania; Notice of Revised Determination on Reconsideration

By letter of February 10, 2000, petitioners requested reconsideration of the Department's negative determination applicable to workers and former workers of the subject firm.

The initial investigation resulted in a negative determination issued on December 28, 1999, based on the finding that criterion (1) of the worker group eligibility requirements of paragraph (a)(1) of section 250 of the Trade Act of 1974, as amended, was not met. Net employment at the Larue facility increased in 1999 compared to 1998. The notice of negative determination was published in the **Federal Register** on January 14, 2000 (65 FR 2433).

The petitioners presented information showing that the articles subject of the petition investigation were produced in Middletown, not Larue, Pennsylvania. On reconsideration the company provided employment data for the Middletown, Pennsylvania plant of the
