Forest Service

Title: State Petitions for Roadless Management.

OMB Control Number: 0596-0178.
Summary of Collection: The Forest Service (FS) has the authority to collect relevant information pertinent to the management of national forests. The current United States Code outlines these authorities in U.S.C. Title 16 (Sections 475 and 511) derived from the National Forest Organic Act of 1897 and the U.S.C. Title 16 (Sections 1600-1604, 1608-1610, and 1611-1613) based on the Forest and Rangeland Renewable Resources Planning Act of 1974 and the National Forest Management Act of 1976. On January 12, 2001, the USDA promulgated the Roadless Rule at 36 CFR 294. The Rule changed the FS's longstanding approach to management of inventoried roadless areas by establishing nationwide prohibitions limiting, with some exceptions, timber harvest, road construction, and road reconstruction within inventoried roadless areas on National Forest System (NFS) lands. Prior to the Roadless Rule, management direction for these areas was developed for each individual NFS unit through the local land management planning process. During the development of the Roadless Rule, several western state governors requested and were denied cooperating agency status to assist with the preparation of the rule and accompanying environmental impact statement. After the decision, the FS established an individual state petitioning process in 36 CFR Part 294. State and territorial governors use the petitioning process to seek establishment of management requirements for NFS inventoried roadless areas with their states.

Need and Use of the Information: FS will collect information from the petition that shall include the following: (1) The location and description of the particular lands for which the petition is being made; (2) the particular management requirements sought and any exceptions; (3) the identification of the circumstances and needs intended to be addressed by the petition; (4) a description of how the management requirements identified in (2) differ from the existing applicable land

management; (5) a description of how the management requirements identified in item (2) compare to existing state land conservation policies and direction set forth in any applicable state land and resource management plan; (6) a description of how the recommended management requirements identified in item (2) would affect fish and wildlife that utilize the particular lands in question; and (7) a description of any public involvement efforts undertaken by the state during development of the petition, including efforts to engage local governments, and: persons with expertise in fish and wildlife biology, fish and wildlife management, forest management outdoor recreation, and other important disciplines.

Description of Respondents: State, Local or Tribal Government.

Number of Respondents: 12.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 12,000.

Departmental Information Collection Clearance Officer.

SUPPLEMENTARY INFORMATION:

Title: Hawaiian and Territorial Quarantine Notices.

OMB Number: 0579-0198.

Type of Request: Extension of approval of an information collection.

Abstract: As authorized by the Plant Protection Act (7 U.S.C. 7701 *et seq.*) (PPA), the Secretary of Agriculture may prohibit or restrict the importation, entry, exportation, or movement in interstate commerce of any plant, plant product, biological control organism, noxious weed, means of conveyance, or other article if the Secretary determines that the prohibition or restriction is necessary to prevent a plant pest or noxious weed from being introduced into or disseminated within the United States. This authority has been delegated to the Animal and Plant Health Inspection Service (APHIS), which administers regulations to implement the PPA.

Regulations governing the interstate movement of plants and plant products from Hawaii and U.S. territories, including Guam, Puerto Rico, and the U.S. Virgin Islands, are contained in 7 CFR part 318, "Hawaiian and Territorial Quarantine Notices."

These regulations are necessary to prevent the interstate spread of plant pests such as the Mediterranean fruit fly, the melon fly, the Oriental fruit fly, green coffee scale, the bean pod borer, and other plant pests to noninfested areas of the United States.

Administering these regulations requires APHIS to collect information from a variety of individuals who are involved in growing, packing, handling, and transporting plants and plant products. This information serves as supporting documentation required for the issuance of forms and documents
