SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC or Commission) is issuing a revised guide in the agency's "Regulatory Guide" series. This series was developed to describe and make available to the public information such as methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

Regulatory Guide 1.205, Revision 1, "Risk-Informed, Performance-Based Fire Protection for Existing Light-Water Nuclear Power Plants," was issued with a temporary identification as Draft Regulatory Guide, DG-1218. Regulatory Guide 1.205, Revision 1, incorporates the lessons-learned from ongoing review of the National Fire Protection Association Standard 805 pilot applications and endorses the recently released Revision 2 of Nuclear Energy Institute document NEI 04-02, "Guidance for Implementing a Risk-Informed, Performance-Based Fire Protection Program Under Title 10 of the Code of Federal Regulations Part 50.48(c)." The technical information in the draft RG was developed by the Office of Nuclear Reactor Regulation staff in conjunction with agency stakeholders.
