

vehicle was not seen or heard during the launch window, and no sonic boom was heard or recorded. None of the monitored animals made any visible movements outside of normal behavior during or after the launch, and animals continued to haul out at the site and persist in high numbers immediately after the launch. In summary, there was no evidence of injury, mortality, or abnormal behavior of the monitored pinnipeds on SMI as a result of this launch.

Atlas V DMSP-18

This launch occurred outside of the harbor seal pupping season, and no sonic boom greater than 1 psf was predicted to impact SMI. Therefore, no biological or acoustical monitoring was required at VAFB or SMI. However, due to an equipment malfunction during the acoustic recording of the initial Atlas V launch in March 2008, only an incomplete acoustic profile was obtained. Therefore, acoustic monitoring of this second Atlas V launch was performed. The results are contained in the 2009 annual LOA report (ManTech SRS Technologies, 2009).

Minuteman III GT-199 GM

Due to the Minuteman's westward launch trajectory, no sonic boom modeling or launch monitoring was required on SMI for this launch. Additionally, no acoustic recordings were required as noise from the Minuteman launch vehicle has been well quantified by measurements performed for previous Minuteman launches. However, since this launch occurred during the harbor seal pupping season on VAFB, biological monitoring was required at VAFB. Diurnal observations of harbor seals were conducted at the Lion's Head haul-out site from June 26 through July 1, 2009. The number of harbor seals observed during the monitoring period ranged from three to 11 seals. Post-launch counts exceeded pre-launch counts. No pups were seen during the launch monitoring period. Additionally, no seals were present within the video recorder frame at the time of the launch. In summary, there was no evidence of injury, mortality, or abnormal behavior in any monitored harbor seals on VAFB resulting from this launch.

Authorization

The USAF complied with the requirements of the 2009 LOA, and NMFS has determined that the marine mammal take resulting from the 2009 launches is within that analyzed in and anticipated by the associated

regulations. Accordingly, NMFS has issued a LOA to the 30th Space Wing, USAF authorizing the take by harassment of marine mammals incidental to space vehicle and test flight activities at VAFB. Issuance of this LOA is based on findings described in the preamble to the final rule (74 FR 6236, February 6, 2009) and supported by information contained in VAFB's 2009 annual report that the activities described under this LOA will have a negligible impact on marine mammal stocks. The provision requiring that the activity not have an unmitigable adverse impact on the availability of the affected species or stock for subsistence uses does not apply for this action.
