**Proposed Data Collections Submitted
for Public Comment and
Recommendations**

The Centers for Disease Control and
Prevention (CDC) publishes a list of
information collection requests under

review by the Office of Management and
Budget (OMB) in compliance with the
Paperwork Reduction Act (44 U.S.C.
Chapter 35). To request a copy of these
requests, call the CDC Reports Clearance
Officer at (404) 498-1210 or send an
email to omb@cdc.gov. Send written
comments to CDC Desk Officer, Human
Resources and Housing Branch, New
Executive Office Building, Room 10235,
Washington, DC 20503 or by fax to (202)
395-6974. Written comments should be
received within 30 days of this notice.

Proposed Project

Pulmonary Function Testing Course Approval Program, 29 CFR 1910.1043, OMB No. 0920-0138—Revision—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

NIOSH has the responsibility under the Cotton Dust Standard, 29 CFR 1920.1043, for approving courses to train technicians to perform pulmonary function testing in the Cotton Dust Industry. Successful completion of a NIOSH-approved course is mandatory under the Standard. To carry out its responsibility, NIOSH maintains a Pulmonary Function Testing Course

Approval Program. The program consists of an application submitted by potential sponsors who seek NIOSH approval to conduct courses. The application form and added materials, including an agenda, vitae, and course materials are reviewed by NIOSH to determine if the applicant has developed a program which adheres to the criteria required in the Standard. Following approval, any subsequent changes to the course are submitted by course sponsors via letter or e-mail and reviewed by NIOSH staff to assure that the changes in faculty or course content continue to meet course requirements.

Course sponsors also voluntarily submit an annual report to inform

NIOSH of their class activity level and if any faculty changes have occurred. Applications and materials to be a course sponsor and carry out training are submitted voluntarily by institutions and organizations throughout the country. This is required by NIOSH to evaluate a course to determine whether it meets the criteria in the Standard and whether technicians will be adequately trained as mandated under the Standard. One question regarding faculty changes was added to the previously approved annual report. There will be no cost to respondents except their time to participate. The estimated annualized burden is 64 hours.

ANNUALIZED BURDEN TABLE

| Respondents | Number of respondents | Number of responses/ respondents | Average burden/ response (in hrs) |
|---------------------------------|-----------------------|----------------------------------|-----------------------------------|
| Initial Application | 5 | 1 | 3.5 |
| Annual Report | 50 | 1 | 45/60 |
| Report for Course Changes | 12 | 1 | 45/60 |

Dated: November 29, 2004.

B. Kathy Skipper,

Acting Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC Reports Clearance Officer at (404) 498-1210. CDC is requesting an emergency clearance for this data collection with a seven-day public comment period. CDC is requesting OMB approval of this package seven days after the end of the public comment period.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. As this is an emergency clearance, please direct comments to the CDC Desk Officer, Human Resources and Housing Branch, New Executive Office Building, Room 10235, Washington, DC 20503 or by fax to (202) 395-6974. Comments should be received within seven days of this notice.

Proposed Project: Performance Evaluation Program for Severe Acute Respiratory Syndrome Antibody (SARS Ab) Testing—New—Public Health Practice Program Office (PHPO), Centers for Disease Control and Prevention (CDC).

Great attention has been focused on SARS which is a viral respiratory illness caused by a coronavirus, called SARS-associated coronavirus (SARS-CoV). SARS was first reported in Asia in February 2003. Over the next few months, the illness spread to more than

two dozen countries in North America, South America, Europe, and Asia before the SARS global outbreak of 2003 was contained.

The SARS virus has recently been shown to be endemic in some populations, and as the season most conducive for SARS infection approaches, the possibility for an outbreak or epidemic exists. Therefore, it is imperative that the CDC ensure all State Public Health laboratories and other laboratories designated by CDC remain proficient in performing SARS testing. For this reason, it is of critical public health importance, at this time, that the CDC develop and maintain a performance evaluation program for SARS.

CDC, through the Model Performance Evaluation Program (MPEP), intends to provide a new SARS-CoV testing performance evaluation program (SARS MPEP). This program will offer external performance evaluation for SARS Ab testing. Participation in the performance evaluation program is expected to lead to improved SARS testing performance because participants have the opportunity to identify areas for improvement. This will help ensure accurate testing as a basis for development of SARS prevention and intervention strategies.

This external quality assessment program will be made available at no cost (for receipt of sample panels) to 54 state laboratories. Participants in the
