Endangered and Threatened Wildlife and Plants; Determination of Critical Habitat for the Marbled Murrelet

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), request public comment in regard to our designation of critical habitat for the marbled murrelet (*Brachyramphus marmoratus*) under the Endangered Species Act of 1973, as amended (Act). The current designation includes approximately 3,698,100 acres (1,497,000 hectares) of critical habitat in the States of Washington, Oregon, and California. We are reconsidering this designation for the purpose of assessing whether all of the designated areas meet the statutory definition of critical habitat. Because our proposed determination is that all areas currently designated do meet the statutory definition, we are not proposing any changes to the boundaries of the specific areas identified as critical habitat at this time. We seek public comment on our proposed determination.
