NATIONAL TRANSPORTATION SAFETY BOARD

Plan for Generic Information Collection Activity: Submission for OMB Review; Comment Request

AGENCY: National Transportation Safety Board (NTSB).

ACTION: Notice.

SUMMARY: The NTSB is announcing it is submitting a plan for an Information Collection Request (ICR) to the Office of Management and Budget (OMB) for approval, in accordance with the Paperwork Reduction Act. This ICR Plan describes various questionnaires the NTSB plans to use to obtain feedback from witnesses who observe crashes, accidents, and/or incidents in all modes of transportation. Feedback from such witnesses, including those who are survivors of crashes and accidents, is important to the NTSB in fulfilling its obligation of determining the probable cause of transportation events, and in recommending changes to mitigate the effects of future transportation events. This Notice informs the public that it may submit to the NTSB comments concerning the agency's proposed plan for information collection.

DATES: Submit written comments regarding this proposed plan for the collection of information by November 18, 2013.

ADDRESSES: Respondents may submit written comments on the collection of information to the National Transportation Safety Board, Office of General Counsel, 490 East L'Enfant Plaza SW., Washington, DC 20594.

FOR FURTHER INFORMATION CONTACT: David Tochen, NTSB General Counsel, at (202) 314–6080.

SUPPLEMENTARY INFORMATION: In accordance with OMB regulations that require this Notice for proposed ICRs, as well as OMB guidance concerning generic approval of plans for information collections, the NTSB herein notifies the public that it may submit comments on this proposed ICR to the NTSB. 5 CFR 1320.10(a). Section 1320.10(a) requires this "notice directing requests for information, including copies of the proposed collection of information and supporting documentation, to the [NTSB]." Pursuant to § 1320.10(a), the NTSB will provide a copy of this notice to OMB.

A. NTSB Witness and Passenger Questionnaires Are Appropriate for Generic Approval

On May 28, 2010, Administrator, Office of Information and Regulatory Affairs (OIRA), OMB, issued a memorandum to the Heads of Executive Departments and Agencies, and Independent Regulatory Agencies, providing instructions concerning how agencies can obtain generic OMB clearances for information collections in

certain circumstances. Paperwork
Reduction Act—Generic Clearances,
available at http://www.whitehouse.gov/
sites/default/files/omb/assets/inforeg/
PRA_Gen_ICRs_5-28-2010.pdf. The
memorandum states as follows
concerning the appropriateness of
obtaining such clearances:

A generic ICR is a request for OMB approval of a plan for conducting more than one information collection using very similar methods when (1) the need for and the overall practical utility of the data collection can be evaluated in advance, as part of the review of the proposed plan, but (2) the agency cannot determine the details of the specific individual collections until a later time.

The NTSB's need to obtain information immediately following a transportation event it is investigating under 49 U.S.C. 1131 is critical. When numerous witnesses observe a transportation crash, accident or incident, the most effective and timely manner in which the NTSB can obtain first-hand observations is via distributing questionnaires to all witnesses the NTSB can locate.

This type of information collection is appropriate for generic approval under the applicable OMB guidance. Based on its investigation of previous transportation events, the NTSB can attest to the utility and value of collecting information via witness questionnaires. By distributing such questionnaires, the NTSB will gather information concerning where the witness was located at the time of the event, whether the witness needed medical attention, and what type of assistance the witness may have received during and immediately following the event. Responses to such questions may help the NTSB in determining the probable cause of the accident or incident, and will likely also assist the NTSB in issuing safety recommendations to mitigate the effects of future transportation mishaps and may help ensure the effectiveness of its family assistance activities.

The NTSB tailors each questionnaire to ensure it requests information specific to the particular event the NTSB is investigating. Consistent with the OMB guidance concerning generic approvals, the NTSB will not be able to finalize draft questionnaires specific to each accident or incident until the event has occurred. Often, questionnaires include a diagram of the aircraft, rail car, bus, vessel, or other vehicle involved in the event, and requests the respondent pinpoint his or her location by drawing on the diagram. In addition, the questionnaire may include questions concerning life preservers or other
