*LOAs are issued for bonafide scientific research activities involved non-ATCA managed species (i.e., sharks). Collections made under an LOAs are not authorized; rather this estimated harvest for research is acknowledged by NMFS. Permittees are encouraged to report all fishing activities in a timely manner.

Final decisions on the issuance of any EFPs, SRPs, Display, and Chartering Permits will depend on the submission of all required information about the proposed activities, NMFS's review of public comments received on this notice, an applicant's reporting history on past permits issued, past law enforcement violations, consistency with relevant NEPA documents, and any consultations with appropriate Regional Fishery Management Councils, states, or Federal agencies. NMFS does not anticipate any significant environmental impacts from the issuance of these EFPs as assessed in the 1999 FMP and Amendment 2 to the Consolidated HMS FMP.

The panels may also provide advice to the Council on its policies and procedures for addressing environmental affairs.
