Title: Tribal TANF Data Report, TANF Annual Report, and Reasonable Cause/ Corrective Action Documentation Process–Final

Description: 42 U.S.C. 612 (Section 412 of the Social Security Act as amended by Public Law 104–193, the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (PRWORA)), mandates that federally recognized Indian Tribes with an approved Tribal TANF program collect and submit to the Secretary of the

Department of Health and Human Services data on the recipients served by the Tribes' programs. This information includes both aggregated and disaggregated data on case characteristics and individual characteristics. In addition, Tribes that are subject to a penalty are allowed to provide reasonable cause justifications as to why a penalty should not be imposed or may develop and implement corrective compliance procedures to eliminate the source of the penalty. Finally, there is an annual report, which requires the Tribes to describe program characteristics. All of the above requirements are currently approved by OMB and the Administration for Children and Families is simply proposing to extend them without any changes.

Respondents: Federally recognized Indian tribes

# Proposed Information Collection Activity; Comment Request

*Title:* Prevention Services Data Collection.

OMB No.: 0970-NEW.

Description: Section 471(e)(4)(E) of the Social Security Act (the Act) (42 U.S.C. 671) as amended by Public Law 115–123 requires state and tribal child welfare agencies to collect and report to the Administration for Children and Families (ACF) information on children receiving prevention and family services and programs. States and tribes must report:

- The specific services or programs provided,
- The total expenditures for each of the services or programs provided,
- The duration of the services or programs provided, and
- If the child was identified in a prevention plan as a candidate for foster care:
- The child's placement status at the beginning, and at the end, of the 12

month period that begins on the date the child was identified as a candidate for foster care in a prevention plan; and

 whether the child entered foster care during the initial 12 month period and during the subsequent 12 month period.

It is anticipated that half or less of the tribes and states will choose to provide these prevention services in the first years of the program availability, but that number will increase over time.

The data collected will inform federal policy decisions, program management, and responses to Congressional and Departmental inquiries. Specifically, the data will provide information about the use and availability of prevention services to children to prevent the need for foster care placement. The data will contain personally identifiable information (date of birth and race/ethnicity).

Respondents: State and tribal child welfare agencies.
