SUPPLEMENTARY INFORMATION:

Authority

Issuance of permits and permit modifications, as required by the Endangered Species Act of 1973 (16 U.S.C. 1531-1543) (ESA), is based on a finding that such permits/modifications: (1) are applied for in good faith; (2) would not operate to the disadvantage of the listed species which are the subject of the permits; and (3) are consistent with the purposes and policies set forth in section 2 of the ESA. Scientific research and/or enhancement permits are issued under section 10(a)(1)(A) of the ESA. Authority to take listed species is subject to conditions set forth in the permits. Permits and modifications are issued in accordance with and are subject to the ESA and NMFS regulations governing listed fish and wildlife permits (50 CFR parts 222-226).

Those individuals requesting a hearing on an application listed in this notice should set out the specific reasons why a hearing on that application would be appropriate (see **ADDRESSES**). The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in the permit action summaries are those of the applicant and do not necessarily reflect the views of NMFS.

Species Covered in This Notice

The following species are covered in this notice:

Sea Turtles

Threatened and endangered Green turtle (*Chelonia mydas*)

Endangered Hawksbill turtle (*Eretmochelys imbricata*)

Endangered Kemp's ridley turtle (*Lepidochelys kempii*)

Endangered Leatherback turtle (*Dermochelys coriacea*)

Threatened Loggerhead turtle (*Caretta caretta*)

The applicant requests a modification to Permit 1266. Permit 1266 authorizes the capture by trawl, handle, flipper tag and release of sea turtles while removing them from the path of hopper dredges. The Permit authorized the take of 30 loggerhead, 7 green, 5 Kemp's ridleys, 4 hawksbills and 4 leatherback sea turtles. These animals were measured, flipper tagged and released. Modification #1 would increase the authorized annual take to 350 loggerhead, 150 green, 150 Kemp's ridley, 10 hawksbill and 10 leatherback sea turtles for the purpose of moving them out of the path of hopper dredges and to tag the sea turtles for tracking purposes. The applicant would also begin passive integrated transponder (PIT) tagging the sea turtles.

A notice of receipt of this application was published on November 30, 2001 (66 FR 59781) and the comment period closed on December 31, 2001. Based on substantive comments received during the initial comment period, NMFS requested additional information from the applicant and NMFS attempted to provide the additional information by mail to commenters who had expressed interest in the information. The comment period was reopened on February 25, 2002 (67 FR 8526) to close March 27, 2002. Due to an unforeseen delay with the mail, this information did not reach the intended recipients in a timely manner. NMFS reviewed the situation and has determined that in this case, there is cause to provide for an extension of the comment period, allowing the interested parties to review the additional information and provide comments. In extending this comment period NMFS finds that a public hearing is not warranted because the issues raised by the comments can be clarified in writing. However, NMFS is providing through this notice an opportunity for additional written comments.

SUPPLEMENTARY INFORMATION:**I. Abstract**

The Job Application Rating System (JARS) is a system by which the USPTO can rapidly review applications for employment of entry-level patent examiners. The Office of Human Resources (OHR), armed with a recommendation from a Supervisory Patent Examiner (SPE) can, in turn, rapidly make an offer of employment and support hiring actions with necessary administrative action. Over the past three fiscal years, JARS has enabled the Patent Corps to hire more than 1,600 entry-level patent examiners.
