General Description of Collection:

When a bank fails, the FDIC must provide depositors insured funds “as soon as possible” after failure while also resolving the failed bank in the least costly manner. The 12 CFR part 370 facilitates prompt payment of FDIC-insured deposits when large insured depository institutions fail. The rule requires insured depository institutions that have two million or more deposit accounts (“covered institutions”), to maintain complete and accurate data on each depositor’s ownership interest by right and capacity for all of the covered institution’s deposit accounts. The covered institutions are required to develop the capability to calculate the insured and uninsured amounts for each deposit owner, by ownership right and capacity, for all deposit accounts. This data would be used by the FDIC to make timely deposit insurance determinations in the event of a covered insured depository institution’s failure.

There is no change in the method or substance of the collection. The overall reduction in burden hours arises almost entirely from the reduction in the number of respondents for ICs 1–3 capturing the implementation burdens, especially the reduction in the number of covered institutions of Highest Complexity. The reduction for that IC alone is almost 400,000 hours per year.

Request for Comment

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the FDIC’s functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collection, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information

on respondents, including through the use of automated collection techniques or other forms of information technology. All comments will become a matter of public record.
