SUPPLEMENTARY INFORMATION:

Title: Disclosure of Change-of-Gauge Services.

OMB Control Number: 2105-0538.

Expiration Date: September 30, 2005.

Type of Request: Extension of a previously approved collection.

Abstract: Change-of-gauge service is scheduled passenger air transportation for which the operating carrier uses one single flight number even though passengers do not travel in the same aircraft from origin to destination but must change planes at an intermediate stop. In addition to one-flight-to-one-flight change-of-gauge services, change-of-gauge services can also involve aircraft changes between multiple flights on one side of the change point and one single flight on the other side. As with one-for-one-change-of-gauge services, the carrier assigns a single flight number for the passenger's entire itinerary even though the passenger changes planes, but in addition, the single flight to or from the exchange point itself has multiple numbers, one for each segment with which it connects and one for the local market in which it operates. The Department recognizes various public benefits that can flow from change-of-gauge services, such as a lowered likelihood of missed connections. However, although change-of-gauge flights can offer valuable consumer benefits, they can be confusing and misleading unless consumers are given reasonable and timely notice that they will be required to change planes during their journey.

Section 41712 of Title 49 of the U.S. code authorizes the Department to decide if a U.S. air carrier or foreign air carrier or ticket agent (including travel agents) has engaged in unfair or
