

and lodged a proposed Consent Decree with the United States District Court for the Southern District of Indiana in *United States and the State of Indiana v. Metalworking Lubricants Company*, Civil Case No. 22–1560 (S.D. Ind.).

The proposed Consent Decree resolves several Clean Air Act and State law claims against Metalworking Lubricants Company (MLC), for alleged violations of the Clean Air Act and MLC’s Federally Enforceable State Operating Permit, including for emitting more than 24 tons per year of organic hazardous air pollutants from MLC’s used oil processing facility located in Indianapolis, Indiana. Under the settlement, MLC will install, maintain, operate, and continuously monitor a Carbon Adsorption System to control organic emissions from its oil and wastewater processing tanks. MLC also will install new tanks, oil-water separators, piping and/or ductwork, and make repairs to the existing tanks, oil-water separators, piping and/or ductwork to ensure that all existing, new, and replacement oil processing tanks and oil-water separators are covered by fixed roofs and vented directly through a closed-vent system to significantly reduce emissions. In addition, MLC will pay a civil penalty of \$310,000, split equally between the United States and the State of Indiana.

The publication of this notice opens a 30-day period for public comment on the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States and State of Indiana v. II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, "Cooperation with States at Commercial Nuclear Power Plants and Other Nuclear Production or Utilization Facilities." The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on April 25, 2022 (87 FR 24348).

1. *The title of the information collection*: Cooperation with States at Commercial Nuclear Power Plants and Other Nuclear Production or Utilization Facilities.

2. *OMB approval number*: 3150-0163.

3. *Type of submission*: Extension.

4. *The form number, if applicable*: Not applicable.

5. *How often the collection is required or requested*: On occasion, when a State or Federally recognized Indian Tribe wishes to observe NRC inspections or perform inspections for the NRC or when a State or Federally recognized Indian Tribe wishes to negotiate an agreement to observe or perform inspections. States with an instrument of cooperation or a State Resident Engineer have both regular reporting and occasion-specific reporting.

6. *Who will be required or asked to respond*: States and Federally recognized Tribes interested in observing or performing inspections.

7. *The estimated number of annual responses*: 207.

8. *The estimated number of annual respondents*: 33.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request*: 1219.

10. *Abstract*: States and Federally recognized Indian Tribes are involved and interested in monitoring the safety status of nuclear power plants and other nuclear production and utilization facilities. This involvement is, in part, in response to the States' and Tribes' public health and safety responsibilities

and, in part, in response to their citizens' desire to become more knowledgeable about the safety of nuclear power plants and other nuclear production and utilization facilities. States and Tribes have identified NRC inspections as one possible source of knowledge for their personnel regarding NRC licensee activities, and the NRC, through the policy statement, "Cooperation with States at Commercial Nuclear Power Plants and Other Nuclear Production or Utilization Facilities" (57 FR 6462; February 25, 1992), has been amenable to accommodating States' and Tribes' needs in this regard. The NRC uses the information collected under this information collection requirement to allow States and Federally recognized Indian Tribes to participate in or observe inspections at NRC-licensed facilities. The types of information collected include written requests identifying specific inspections States and Tribes wish to observe; identification-related information required for site access to NRC-licensed facilities; training and qualifications of State and Tribal personnel participating in inspections; information required to define inspection roles for States and Tribes; and information to coordinate NRC and State and Tribal inspections.

Dated: August 5, 2022.

NRC Clearance Officer, Office of the Chief Information Officer.
