

Abstract: Section 3004 of the Resource Conservation and Recovery Act (RCRA), as amended, requires that EPA develop standards for hazardous waste treatment, storage, and disposal as may be necessary to protect human health and the environment. Subsections 3004(d), (e), and (g) require EPA to promulgate regulations that prohibit the land disposal of hazardous waste unless it meets specified treatment standards described in subsection 3004(m).

The regulations implementing these requirements are codified in the Code of Federal Regulations (CFR) Title 40, Part 268. EPA requires that facilities maintain the data outlined in this ICR so that the Agency can ensure that land disposed waste meets the treatment standards. EPA strongly believes that the recordkeeping requirements are necessary for the agency to fulfill its congressional mandate to protect human health and the environment.

SUPPLEMENTARY INFORMATION: EPA is exploring opportunities to streamline and modernize its existing fuels regulations under 40 CFR part 80 to update EPA's existing gasoline, diesel, and other fuels regulations to help reduce burden for stakeholders as well as EPA, while improving overall compliance assurance and maintaining environmental performance. EPA intends to achieve this goal in streamlining the existing fuels regulations by: Deleting expired provisions, eliminating redundant compliance provisions (e.g., duplicative registration requirements that are required by every EPA fuels program), and replacing them with a single set of provisions and definitions that would apply across all gasoline, diesel, and other fuels programs currently under 40 CFR part 80.

The workshop will provide the opportunity for EPA to update stakeholders on its progress regarding this streamlining of the existing fuels regulations, and for stakeholders to provide initial feedback as EPA develops its proposed rule.

Dated: April 25, 2018.

Christopher Grundler,

Director, Office of Transportation and Air Quality, Office of Air and Radiation.
