

this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before March 6, 2002, file with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 14 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions

on the Commission's Web site under the "e-Filing" link.

If the Commission decides to set the application for a formal hearing before an Administrative Law Judge, the Commission will issue another notice describing that process. At the end of the Commission's review process, a final Commission order approving or denying a certificate will be issued.

Linwood A. Watson, Jr.,

Deputy Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP02-60-000]

CMS Trunkline LNG Company, LLC.; Notice of Intent To Prepare an Environmental Assessment for the Proposed Trunkline LNG Expansion Project, Request for Comments on Environmental Issues, and Notice of Public Meeting

February 13, 2002.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of CMS Trunkline LNG Company, LLC's (Trunkline LNG) Expansion Project involving construction and operation of facilities in Calcasieu Parish, Louisiana.¹ The project involves expanding the storage and sendout capacity of Trunkline LNG's existing, certificated liquefied natural gas (LNG) marine import terminal. This EA will be used by the Commission in its decision-making process to determine whether the project is in the public convenience and necessity.

Summary of the Proposed Project

Trunkline LNG proposes: (1) To expand the LNG storage capacity; (2) to increase the sustainable daily sendout capability to 1,200 million cubic feet per day (MMcfd) and its peaking capacity to 1,300 MMcfd; and (3) to accommodate two LNG tankers at one time. Trunkline LNG seeks authorization to construct and operate the following new facilities at its existing site:

- LNG ship unloading facility with three liquid unloading arms, one vapor return/delivery arm, mooring and breasting dolphins, fendering system, and support trestles;
- One 880,000 barrel (2.9 billion cubic feet of gas equivalent) double-wall LNG storage tank with spill containment dike;
- Three 360 MMcfd first stage LNG pumps;
- Four 192 MMcfd second stage LNG pumps with a recondenser vessel;
- Three 150 MMcfd submerged combustion vaporizers;
- One desuperheater;
- High expansion foam building;
- Electrical building;
- One cryogenic fuel gas/ship vapor return compressor;

¹ Trunkline LNG's application was filed with the Commission under Section 7 of the Natural Gas Act and Part 157 of the Commission's regulations.
