SUPPLEMENTARY INFORMATION: Notice of this meeting is given under the *Federal Advisory Committee Act,* 5 U.S.C. Appendix (Pub. L. 92–463). The NSTAC advises the President on matters related to national security and emergency preparedness (NS/EP) telecommunications policy.

Agenda: The committee will meet in the open session to receive an update on current engagement activities between the NSTAC and the NS/EP Communications Executive Committee. The NSTAC will also hold a panel discussion on high performance computing and big data convergence, focusing on public private and cross agency collaboration and the predictive analytics capabilities of big data. The NSTAC will receive brief remarks on the U.S. Department of Commerce's (DOC) progress in promoting Government's cybersecurity efforts since the adoption of the National Institute of Standards and Technology Cybersecurity Framework, the process and approach under which the DOC continues to seek partners for its cybersecurity initiatives, and how private sector participation helps to promote the DOC's cybersecurity efforts. In addition, the NSTAC will receive an update on the work of the NSTAC's examination of big data analytics. The meeting agenda will be available at *www.dhs.gov/nstac* as of October 27, 2015.

The NSTAC will meet in a closed session to hear a classified briefing regarding current cyber threats against the communications infrastructure, and to discuss potential future NSTAC study topics.

Basis for Closure: In accordance with 5 U.S.C. 552b(c), *The Government in the Sunshine Act,* it has been determined that two agenda items require closure as the disclosure of the information would not be in the public interest.

The first of these agenda items, the classified briefing, will provide members with information on current threats against the communications infrastructure. Disclosure of these threats would provide criminals who wish to intrude into commercial and Government networks with information on potential vulnerabilities and mitigation techniques, also weakening existing cybersecurity defense tactics. This briefing will be classified at the top secret level, thereby exempting disclosure of the content by statute. Therefore, this portion of the meeting is required to be closed pursuant to 5 U.S.C. 552b(c)(1)(A).

The second agenda item, the discussion of potential NSTAC study topics, will address areas of critical cybersecurity vulnerabilities and priorities for Government. Government officials will share data with NSTAC members on initiatives, assessments, and future security requirements across public and private networks. The data to be shared includes specific vulnerabilities within cyberspace that affect the Nation's communications and information technology infrastructures and proposed mitigation strategies. Disclosure of this information to the public would provide criminals with an incentive to focus on these vulnerabilities to increase attacks on our cyber and communications networks. Therefore, this portion of the meeting is likely to significantly frustrate implementation of proposed DHS actions and is required to be closed pursuant to 5 U.S.C. 552b(c)(9)(B).

Dated: October 20, 2015.

Helen Jackson,

Designated Federal Officer for the NSTAC.

Background and Purpose

On February 13, 2015, President Obama signed Executive Order 13691 intended to enable and facilitate ''private companies, nonprofit organizations, and executive departments and agencies . . . to share information related to cybersecurity risks and incidents and collaborate to respond in as close to real time as possible.''

At the Standards Organization's initial public meeting, they intend to review the results of previous DHS-hosted public workshops, and share a proposed standards framework and standards development process. In addition, they will solicit suggestions on existing standards, guidelines, and best practices that can be shared as provisional guidance until formal ISAO standards are established. Minutes from
