Pollinator Summit: Status of Ongoing Collaborative Efforts To Protect Pollinators; Notice of Public Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Office of Chemical Safety and Pollution Prevention, in conjunction with the United States Department of Agriculture, will facilitate a public meeting with parties engaged in activities to reduce potential acute exposure of honey bees and pollinators to pesticides. Invited presenters will provide briefings on current activities in three key areas related to improving seed treatment techniques; reducing the generation of dust that occurs during planting operations; and raising awareness of current best management practices that are available to mitigate potential acute pesticide exposure to pollinators. Pollinators are an important component of agricultural production, critical to food and ecosystems, and must be protected so that they can continue to play this important role. The intended outcome of this meeting is to share information and look for areas of collaboration to lessen the unintended impacts of pesticides on pollinators during coming and future growing seasons. This meeting complements

EPA's ongoing work through the Pesticide Program Dialogue Committee (PPDC) to support and take action to improve pollinator health.

DATES: The meeting will be held on March 5, 2013 from 8:00 a.m. to 5:00 p.m. e.s.t.

To request accommodation of a disability, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**, preferably at least 10 days prior to the meeting, to give EPA as much time as possible to process your request.

II. Background

EPA is convening a public meeting to facilitate the exchange of information among parties engaged in various activities related to improving the safety of pollinators around agricultural crops. While there are several factors affecting honey bee health, pesticides are among these variables; and, new research is rapidly becoming available on practices and technology aimed at reducing exposure of pollinators to pesticides. Specifically, this summit will focus on the pesticide treated seed, including the technology of seed treatment and the management of dust that can be associated with planting treated seed and which may lead to pesticide exposure to bees. The public meeting will also include best management techniques associated with commercial agriculture and bees. This summit complements EPA's on-going work with the PPDC Workgroup on Pollinator Protection, which is addressing pesticide labeling, best management practices, enforcement, communication and education. This public summit is being held to increase the awareness among the participants and the public of the rapidly changing understanding of, and response to protecting pollinators at agricultural crops.
