SUPPLEMENTARY INFORMATION:

Reclamation and the Fish and Wildlife Service (Service) have prepared this DEIS to analyze the impacts of the First Increment (13 years) of a proposed Recovery Implementation Program (Program) to benefit the target species (whooping crane, interior least tern, piping plover, and pallid sturgeon) and their habitat in the Platte River Basin and to provide compliance with the Endangered Species Act (ESA) for certain historic and future water uses in the Platte River Basin in Colorado, Nebraska, and Wyoming. The habitat objectives of the proposed Program include: Improving flows in the Central Platte River through water re-regulation and conservation/supply projects; and protecting, restoring, and maintaining at least 10,000 acres of habitat in the Central Platte River area between Lexington and Chapman, Nebraska. The DEIS analyzes the impacts of four alternatives to implement the Program.

The programmatic DEIS focuses on impacts that the Program may have on hydrology, water quality, land, target species and their habitat, other species, hydropower, recreation, economics, and social and cultural resources. Subsequent National Environmental Policy Act and ESA documents required for implementation of specific Program actions will be tiered off of this document.
