B. What Should I Consider as I Prepare My Comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When submitting comments, remember to:

- i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).
- ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- iv. Describe any assumptions and provide any technical information and/or data that you used.
- v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- vi. Provide specific examples to illustrate your concerns and suggest alternatives.
- vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- viii. Make sure to submit your comments by the comment period deadline identified.

II. Did EPA Approve the Application?

The Agency approved the application on January 19, 2007, after considering all required data on risks associated with the proposed use of Z-9-tetradecen-1-yl acetate, Z-11-tetradecen-1-ol, and Z-11-tetradecen-1-ol, and information on social, economic, and environmental benefits to be derived from use. Specifically, the Agency has considered the nature of the chemical and its pattern of use, application methods and rates, and level and extent of potential exposure. Based on these reviews, the Agency was able to make basic health and safety determinations which show that use of Z-9-tetradecen-1-yl acetate, Z-11-tetradecen-1-ol, and Z-11-tetradecen-1-ol when used in accordance with widespread and commonly recognized practice, will not generally cause unreasonable adverse effects to the environment.

III. Approved Application

The company submitted an application to EPA to register the pesticide product Isomate—CM/LR TT containing the three new active ingredients: Z-9-tetradecen-1-yl acetate, Z-11-tetradecen-1-ol, and Z-11-tetradecen-1-ol (EPA File Symbol 53575-31) containing the same chemicals at 4.34%, 1.05%, and 1.00% respectively. However, since the notice of receipt of the application to register the product as required by section 3(c)(4) of FIFRA, as

amended, was not published in the **Federal Register**, interested parties may submit comments on or before March 30, 2007 for this product only.
