

telephone: (727) 896-8626; fax: (727) 893-2947.

**FOR FURTHER INFORMATION CONTACT:** Kim Iverson, Public Information Officer, South Atlantic Fishery Management Council, One Southpark Circle, Suite 306, Charleston, SC 29407-4699; telephone: (843) 571-4366 or toll free: (866) SAFMC-10; fax: (843) 769-4520; email: [kim.iverson@safmc.net](mailto:kim.iverson@safmc.net).

**SUPPLEMENTARY INFORMATION:** Invited workshop participants will meet from 8:30 a.m. – 5 p.m. on October 26, 2005, and from 8:30 a.m. – 1 p.m. on October 27, 2005, to complete a draft of the Council's Deepwater Coral Research and Monitoring Plan. This workshop is a follow up to one held in 2004. The workshop is designed to consolidate and refine sections of the draft document that have been developed through the use of a web portal. When completed, the detailed research and monitoring plan will be integrated into the Council's developing Fishery Ecosystem Plan and support long-term research needs for the proposed deepwater Lophelia coral Habitat Areas of Particular Concern. In addition, the research plan will also comprise the South Atlantic component of NOAA's national strategy for research and monitoring of deepwater coral communities.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Note: The times and sequence specified in this agenda are subject to change.

### Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for auxiliary aids should be directed to the Council office (see **ADDRESSES**) 3 days prior to the meetings.

Dated: October 6, 2005.

#### Endangered Species; File No. 1377

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice; issuance of permit modification.

**SUMMARY:** Notice is hereby given that Dr. Anton Tucker, Mote Marine Laboratory, 1600 Ken Thompson Parkway, Sarasota, FL 34236, has been issued a modification to scientific research Permit No. 1377.

**ADDRESSES:** The modification and related documents are available for review upon written request or by appointment in the following office(s):

Permits, Conservation and Education Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301)713-2289; fax (301)427-2521; and Southeast Region, NMFS, 263 13th Ave South, St. Petersburg, FL 33701; phone (727)824-5312; fax (727)824-5309.

#### FOR FURTHER INFORMATION CONTACT:

Carrie Hubbard or Patrick Opay, (301)713-2289.

**SUPPLEMENTARY INFORMATION:** On January 14, 2004, notice was published in the Federal Register (69 FR 3568) that a modification of Permit No. 1377, issued December 4, 2002 (67 FR 76727), had been requested by the above-named organization. The requested modification has been granted under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222-226).

Modification No. 1 to Permit No. 1377 will allow the holder to expand the study area to include the Florida Keys and Sarasota Bay, and allow the capture, flipper and PIT tagging, and collection of blood and tissue samples from an additional 150 juvenile and subadult green (*Chelonia mydas*), 150 juvenile and sub-adult Kemp's ridley (*Lepidochelys kempii*), 100 juvenile and sub-adult loggerhead (*Caretta caretta*), and 5 juvenile and sub-adult hawksbill (*Eretmochelys imbricata*) sea turtles. The holder will perform additional sampling techniques for all captured turtles including scute scraping for heavy metal analysis, bioelectrical

impedance analysis to determine fat content, and laparoscopic surgery to determine sex and reproductive status. Gastric lavage will be conducted on green sea turtles to obtain dietary samples. The permit holder will utilize additional telemetry instruments and attachment methods, including radio tags, sonic tags, time depth recorders, animal-borne video, audio and environmental data collection systems (AVEDS), and receiver tags (e.g., bioacoustic probe). Instruments will be attached to a subset of turtles in Charlotte Harbor or Sarasota Bay, and a subset of turtles in the Florida Keys. The amended permit expires December 31, 2007.

Issuance of this modification, as required by the ESA was based on a finding that such permit (1) was applied for in good faith, (2) will not operate to the disadvantage of any endangered or threatened species, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: October 6, 2005.

#### Endangered and Threatened Species; Take of Anadromous Fish

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Application and requests for modification of scientific research permits.

**SUMMARY:** Notice is hereby given that NMFS has received one scientific research permit application and 18 modification requests relating to Pacific salmon. The proposed research is intended to increase knowledge of species listed under the Endangered Species Act (ESA) and to help guide management and conservation efforts.

**DATES:** Comments or requests for a public hearing on the applications must be received at the appropriate address or fax number (see **ADDRESSES**) no later than 5 p.m. Pacific daylight-saving time on November 14, 2005.

**ADDRESSES:** Written comments on the applications should be sent to Protected
