FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Eric Orbesen, (305) 361-4253 or Eric.Orbesen@noaa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Cooperative Game Fish Tagging Program was initiated in 1971 as part of a comprehensive research program resulting from passage of Public Law 86-359, Study of Migratory Game Fish, and other legislative acts under which the National Marine Fisheries Service (NMFS) operates. The Cooperative Tagging Center attempts to determine the migration patterns of, and other biological information for, billfish, tunas, and swordfish. The fish tagging report is provided to the angler with the tags, and he/she fills out the card with the information when a fish is tagged and mails it to NMFS. Information on each species is used by NMFS to determine migratory patterns, distance traveled, stock boundaries, age, and growth. These data are necessary input for developing management criteria by regional fishery management councils, states, and NMFS.

II. Method of Collection

Information is submitted by mail.

III. Data

OMB Control Number: 0648-0247.

Form Number: NOAA form 88-162.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a regular submission (new collection). The California Signage Plan is an organized and systematic way to develop and install graphic signs along the California coastline and inland that interpret the natural and cultural resources of a particular location and its connection to the sanctuaries located within California. To date, a strategic approach to evaluating interpretive signs produced by the Office of National Marine Sanctuaries has not been developed; therefore, NOAA does not know if the messages trying to be conveyed to their audiences are effective. NOAA is proposing to conduct an online and onsite survey of approximately 400 visitors to the locations where signs are currently
