ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email PRA@fcc.gov and to nicole.ongele@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418–2991.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0790.

Title: Section 68.110 (b), Availability of Inside Wiring Information.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents and Responses: 200 respondents; 1,200 responses.

Estimated Time per Response: 1 hour.

Frequency of Response: Recordkeeping requirement and third party disclosure requirement.

Obligation to Respond: Mandatory. Providers of wireline

telecommunications services that willfully or repeatedly fail to comply with this rule are subject to forfeitures under 47 CFR 1.80. Statutory authority for this collection of information is contained in 47 U.S.C. 151, 154, 201–205, 218, 220 and 405 of the Communications Act of 1934, as amended.

Total Annual Burden: 1,200 hours.

Total Annual Cost: \$5,000.

Needs and Uses: Section 68.110(b) requires that any available technical information concerning carrier-installed wiring on the customer's side of the demarcation point, including copies of existing schematic diagrams and service records, shall be provided by the telephone company upon request of the building owner or agent thereof. The provider of wireline telecommunications services may charge the building owner a reasonable fee for this service, which shall not exceed the cost involved in locating and copying the documents. In the alternative, the provider may make these documents available for review and copying by the building owner or his agent. In this case, the wireline telecommunications carrier may charge a reasonable fee, which shall not exceed the cost involved in making the documents available, and may also require the building owner or his agent to pay a deposit to guarantee the documents' return. The information is needed so that building owners may choose to contract with an installer of their choice on inside wiring maintenance and installation services to

modify existing wiring or assist with the installation of additional inside wiring.

OMB Control Number: 3060–0859.

Title: Suggested Guidelines for Petitions for Ruling Under Section 253 of the Communications Act of 1934, as amended.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities and State, local, or Tribal governments.

Number of Respondents and

Responses: 24 respondents; 24 responses.

Estimated Time per Response: 63–125 hours.

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Voluntary. Statutory authority for this information collection is contained in 47 U.S.C. 253 of the Communications Act of 1934, as amended.

Total Annual Burden: 1,698 hours.

Total Annual Cost: No Cost.

Needs and Uses: The Commission will submit this extension to the OMB after this 60-day comment period in order to obtain the full three-year clearance from them. Although very few petitions for preemption under section 253 have been filed in the past few years, there is reason to believe that the current estimate is more likely to reflect future developments than a reduction in the number of estimated filings. The Commission published a Public Notice in November 1998 which established suggested guidelines for the filing of petitions for preemption pursuant to section 253 of the Communications Act of 1934, as amended, as well as suggested guidelines for the filing of comments opposing such requests for preemption. The Commission will use this information to resolve petitions for preemption of state or local statutes, regulations, or other state or local legal requirements that are alleged to prohibit or have the effect of prohibiting any entity from providing a telecommunications service. Section 253 of the Communications Act of 1934, as amended, which was added by the Telecommunications Act of 1996, requires the Commission, with certain important exceptions, to preempt (to the extent necessary) the enforcement of any state or local statute or regulation, or other state or local legal requirement that prohibits or has the effect of prohibiting any entity from providing any interstate or intrastate telecommunications service. The Commission's consideration of preemption under section 253 typically begins with the filing of a petition by an

aggrieved party. The Commission typically places such petitions on public notice and requests comment by interested parties. The Commission's decision is based on the public record, generally composed of the petition and comments. The Commission has considered a number of preemption items since the passage of the Telecommunications Act of 1996, and believes it is in the public interest to inform the public of the information necessary for full consideration of the issues likely to be involved in section 253 preemption proceedings. In order to render a timely and informed decision, the Commission expects petitioners and commenters to provide it with relevant information sufficient to describe the legal regime involved in the controversy and to provide the factual information necessary for a decision.

Federal Communications Commission.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1285; FR ID 150556]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business

concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

DATES: Written PRA comments should be submitted on or before August 28, 2023. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email PRA@fcc.gov and to nicole.ongele@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418-2991.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-1285.

Title: Compliance with the Non-IP Call Authentication Solution Rules; Robocall Mitigation Database (RMD).

Form Number: N/A.

Type of Review: Revision of a currently approved information collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 12,800 respondents; 12,800 responses.

Estimated Time per Response: 0.5-6 hours.

Frequency of Response: Recordkeeping requirement and on occasion reporting requirement.

Obligation to Respond: Mandatory and required to obtain or retain benefits. Statutory authority for these collections are contained in sections 227b, 251(e), and 227(e) of the Communications Act of 1934.

Total Annual Burden: 39,663 hours.

Total Annual Cost: No cost.

Needs and Uses: The Pallone-Thune Telephone Robocall Abuse Criminal Enforcement and Deterrence (TRACED) Act directs the Commission to require, no later than 18 months from enactment, all voice service providers to implement STIR/SHAKEN caller ID authentication technology in the internet protocol (IP) portions of their networks and implement an effective caller ID authentication framework in the non-IP portions of their networks. Among other provisions, the TRACED Act also directs the Commission to create extension mechanisms for voice service providers. On September 29,

2020, the Commission adopted its *Call Authentication Trust Anchor Second Report and Order*. See *Call Authentication Trust Anchor*, WC Docket No. 17-97, Second Report and Order, 36 FCC Rcd 1859 (adopted Sept. 29, 2020). The *Second Report and Order* implemented section 4(b)(1)(B) of the TRACED Act, in part, by requiring a voice service provider maintain and be ready to provide the Commission upon request with documented proof that it is participating, either on its own or through a representative, including third party representatives, as a member of a working group, industry standards group, or consortium that is working to develop a non-internet Protocol caller identification authentication solution, or actively testing such a solution. The *Second Report and Order* also implemented the extension mechanisms in section 4(b)(5) by, in part, requiring voice service providers to certify in the Robocall Mitigation Database that they have either implemented STIR/SHAKEN or a adopted a robocall mitigation program and describe that program in a filed plan. On May 19, 2022, the Commission adopted similar obligations for gateway providers. See *Advanced Methods to Target and Eliminate Unlawful Robocalls, Call Authentication Trust Anchor*, CG Docket No. 17-59, WC Docket No. 17-97, Sixth Report and Order *et al.*, FCC 22-27 (adopted May 19, 2022). Specifically, like voice service providers, gateway providers were required to maintain and be ready to provide the Commission upon request with documented proof that it is participating, either on its own or through a representative, including third party representatives, as a member of a working group, industry standards group, or consortium that is working to develop a non-internet Protocol caller identification authentication solution, or actively testing such a solution.

Gateway providers were also required to implement both STIR/SHAKEN on the IP portions of their networks as well as a robocall mitigation program. They must also certify to their implementation and describe their robocall mitigation program in the Robocall Mitigation Database. On March 16, 2023, the Commission adopted an Order imposing largely the same obligations that applied to gateway providers on a new class of providers: non-gateway intermediate providers. See *Call Authentication Trust Anchor*, Sixth Report and Order and Further Notice of Proposed Rulemaking, WC Docket No. 17-97, FCC 23-18 (adopted March 16, 2023). In that action, the

Commission also required all voice service providers to adopt a robocall mitigation program and file a description of that program in the Robocall Mitigation Database as well as requiring all classes of providers to file additional information in the Robocall Mitigation Database. On May 18, 2023, the Commission adopted an Order modifying some of these requirements. See *Call Authentication Trust Anchor, et al.*, WC Docket No. 17-97 *et al.*, Seventh Report and Order *et al.*, FCC 23-37 (adopted May 18, 2023).

Information Collections Being Submitted for Review and Approval to Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, the FCC seeks specific comment on how it might “further reduce the information collection burden for small business concerns with fewer than 25 employees.” The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments and recommendations for the proposed information collection should be submitted on or before July 31, 2023.

ADDRESSES: Comments should be sent to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under
