Abstract: The New Source Performance Standards (NSPS) for Phosphate Rock Plants (40 CFR part 60, subpart NN) apply to the following existing facilities and new facilities at phosphate rock plants with capacities greater than 4 tons per hour: Dryers, calciners, grinders, and ground rock handling and storage facilities, except those facilities producing or preparing phosphate rock solely for consumption in elemental phosphorus production. New facilities include those that commenced construction, modification or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 60, subpart NN. In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

Form Numbers: None.

Respondents/affected entities:

Owners and operators of phosphate rock plants.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart NN).

Estimated number of respondents: 15 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 1,800 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$335,000 (per year), which includes \$126,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an adjustment decrease in the total estimated burden in this ICR as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The adjustment decrease in burden from the most-recently approved ICR is due to a decrease in the number of sources. The growth rate for the industry is very low, negative or non-existent, so the ICR has been adjusted to account for no new respondents over the next three years. This also results in a reduction in capital/startup costs.

Director, Regulatory Support Division.
