Oil and Gas Trade Mission to Israel—Clarification and Amendment

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: The United States Department of Commerce, International Trade Administration, U.S. and Foreign Commercial Service (CS) is publishing this amendment to the Notice of the Oil and Gas Trade Mission to Israel, 77 FR 21748, April 11, 2012, to amend the Notice to revise the Commercial Setting to include new information regarding the shale oil industry in Israel. The revised notice will include information on a shale oil project initiated by Israel Energy Initiatives (IEI), a subsidiary of publicly-traded U.S. company, Genie Energy Ltd.

SUPPLEMENTARY INFORMATION:

Amendments to Revise the Commercial Setting to include information on the shale oil project undertaken by Israel Energy Initiatives:

Background

The new information regarding the shale oil project undertaken by Israel Energy Initiatives, represents a significant export opportunity for U.S. manufacturers. The pilot test project due to begin in 2013 will require significant procurement, on the behalf of Israel Energy Initiatives. In order to ensure the mission statement is accurate and helpful to U.S. manufacturers, the Trade Mission Statement will be amended to include this information.

Amendments

1. For the reasons stated above, the Oil section of the Notice of the Oil and Gas Trade Mission to Israel, 77 FR 21748, April 11, 2012, is amended to read as follows:

Oil and Shale Oil

In March 2010, the U.S. Geological Survey reported that there is an estimated 1.7 billion barrels of recoverable oil in Israel.[6] Also, the World Energy Council estimates Israel's shale deposits could ultimately yield as many as 250 billion barrels of oil.[7] In March 2012, another offshore discovery was made by Modiin and Adira Energy northwest of Tel Aviv, with an estimated 128 million barrels of oil, as well as natural gas.[8] The Meged Field may also contain significant oil reserves. In June 2011, Israeli oil exploration company, Givot Olam, announced that its test production site, Meged 5, was producing 800 barrels a day. According to a report by the international consultancy Baker Hughes, Givot Olam will develop Meged 6 and Meged 7 and perform well stimulation for all its drillings; in the next stage the company will drill up to 40 wells throughout the Meged field.[9] In February 2012, MEWR approved continued production at Meged 5, and development of Meged 6–14 drillings.[10]

In July 2008, Israel's MEWR granted Israel Energy Initiatives (IEI), a subsidiary of the publicly-traded U.S. company Genie Energy Ltd, an exclusive license to explore for and produce shale oil in the Shfela basin region of Israel. IEI estimates that there are 40 billion barrels of oil equivalent in place within its 238 km² license area. The company plans to conduct a pilot test of its in-ground heating process in 2013–2014. Also, in May 2011, the Russian energy company Inter RAO announced that it had received a license to develop oil shale resources in the Negev desert. There may be opportunities for U.S. companies to

provide goods and services related to shale oil development into the nascent industry.

Many oil exploration licenses are set to expire in 2012 and 2013. Exploration companies are limited to how many licenses they can hold in Israel, and given the success of several exploration projects, there are opportunities for U.S. companies to enter Israel's oil exploration market.

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Reef Fish Fishery of the Gulf of Mexico; Exempted Fishing Permit

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of receipt of an application for an exempted fishing permit; request for comments.

SUMMARY: NMFS announces the receipt of an application for an exempted fishing permit (EFP) from Dr. Chris Koenig (Florida State University) and Dr. Chris Stallings (University of South Florida). If granted, the EFP would authorize the applicants to use trained for-hire fishermen to be able to temporarily possess goliath grouper for non-lethal sampling during the course of their normal fishing activities. This non-lethal sampling would include measuring, tagging, and removing a portion of the goliath grouper dorsal fin rays before releasing the live fish. The intent of this study is to provide regional age structure of recovering goliath grouper populations for fish stock assessments.

DATES: Comments must be received no later than 5 p.m., eastern time, on July 13, 2012.
