

Scalable beyond 0.18 μm Generation and Desirable for Ultra High Speed Operation” does not anticipate the asserted claims of the ’805 patent. Regarding the ’134, ’937, and ’477 patents, the Commission affirms the following findings: (1) Cypress failed to prove that the accused products infringe the asserted claims; (2) Cypress failed to establish the technical prong of the domestic industry requirement; and (3) Respondents failed to establish by clear and convincing evidence that the cited prior art references anticipate the asserted claims. The Commission adopts the ID and RID in their entirety as modified and/or supplemented by the Commission opinion. The investigation is terminated.
