Abstract of Information Available

A total of 14 cultural items have been requested for repatriation. The 14 sacred objects are five baskets, five wooden plaques, one dance shield, one T-necklace, one beaded shawl, and one dance cane. 13 of the 14 sacred objects were purchased by Mary and Francis Crane, who donated their collection to the Denver Museum of Nature & Science between 1968 and 1983. In 1954, Mary and Francis Crane purchased two woven plates (AC.58 and AC.106), identified as White Mountain Apache, from Kohlberg's Antiques and Indian Arts in Denver, Colorado. In 1958, Mary and Francis Crane purchased two woven plates (AC.3047 and AC.3152) from Julian D. Pyatt of Trenton, Missouri. In 1959, Mary and Francis Crane purchased a White Mountain Apache beaded shawl (AC.4353) from National News and Gift Shop in Globe, Arizona. In 1964, Mary and Francis Crane purchased one dance shield (AC.7619), one T-necklace (AC.7621), one dance cane (AC.8088), and five wooden plaques (AC.8090A–E) from the Forestdale Trading post in Show Low, Arizona, all of which are identified as White Mountain Apache. In 2003, the estate of Donald Graham donated one White Mountain Apache basket (AN–2003–91.1) to the Denver Museum of Nature & Science.

Determinations

- There is a reasonable connection between the cultural items described in this notice and the White Mountain Apache Tribe of the Fort Apache Reservation, Arizona.

Abstract of Information Available

Human remains representing, at least, eight individuals have been identified. The one lot of associated funerary objects are one lot of faunal bone, charcoal, bark, snail shell, and stone. The Burnt Bluff site (20DE3) is a series of rock shelters and caves located at Big Bay de Nogue/Big Bay de Noc, Delta County, Michigan. Human remains from Burnt Bluff were recovered from two separate caves on two different occasions. Remains were removed from Spider cave in 1953 by an amateur collector and remains were removed from B-95 cave by a University led excavation in 1965. The Ancestors are one adult male, two adults, one infant six months to 1.5 years, one neonate infant, two children, and one adolescent 14-17 years.

Human remains representing, at least, one individual have been identified. No associated funerary objects are present. The human remains from the Chalk Hill Mound site (20ME50) were donated to UMMA in July of 1953 by John Mitchell, who collected them in March of 1953 from a mound at Chalk Hills on the Menominee River, just downstream from Nathan on the Michigan side of the river. No known information as to how the site was found or excavated, or any specific time period for the site. The Ancestor is an adult 30-45 years male.

Human remains representing, at least, one individual have been identified. No associated funerary objects are present. The human remains from the Menominee School site (20ME) were donated to UMMAA by the superintendent of schools for Menominee county; no name is listed on any records. There is very little information regarding the circumstances of how the human remains were found or if they were recovered from a school in Menominee County. The Ancestor is an adult 35-60 years male.

The University of Michigan has no record of, nor do its officials have any knowledge of, any treatment of items with pesticides, preservatives, or other

substances that represent a potential hazard to the collection(s) or to persons handling the collection(s).

- The one lot of objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
