

train employees exposed to MDA at the time of their initial assignment, and at least annually thereafter.

Other paperwork provisions of the MDA Standard require employers to provide employees with medical examinations, including initial, periodic, emergency and follow-up examinations. As part of the medical-surveillance program, employers must ensure that the examining physician receives specific written information, and that they obtain from the physician a written opinion regarding the employee's medical results and exposure limitations.

The MDA Standard also specifies that employers are to establish and maintain exposure-monitoring and medical-surveillance records for each employee who is subject to these respective requirements, make any required record available to OSHA compliance officers and the National Institute for Occupational Safety and Health (NIOSH) for examination and copying, and provide exposure-monitoring and medical-surveillance records to employees and their designated representatives. Finally, employers who cease to do business within the period specified for retaining exposure-monitoring and medical-surveillance records, and who have no successor employer, must notify NIOSH at least 90 days before disposing of the records and transmit the records to NIOSH if so requested.

## II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the information-collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information-collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information-collection and -transmission techniques.

## III. Proposed Actions

OSHA is proposing to increase the existing burden-hour estimate for, and to extend OMB approval of, the collection-of-information requirements specified by the MDA Standard. The Agency proposes to increase the total burden-hour estimate from 1,523 hours to 1,609 hours, an increase of 86 hours.

The additional burden hours result in large part from an increase in the number of employers who develop and maintain objective data, or historical monitoring data, for exempted operations. Also, capital costs rose from \$74,000 to \$80,400 because the cost of analyzing an exposure-monitoring sample increased from \$90 to \$100, while the cost of administering a medical examination rose from \$130 to \$150. OSHA will summarize the comments submitted in response to this notice, and will include this summary in its request to OMB to extend the approval of this information-collection requirements.
