The proposed NDA includes the municipal waters of Boothbay Harbor.

There are marinas, yacht clubs and public landings/piers in the proposed area with a combination of mooring fields and dock space for the recreational and commercial vessels. Maine has certified that there are six pumpout facilities within the proposed area available to the boating public and all facilities are connected to the sewage system. A list of the facilities, phone numbers, locations, and hours of

operation is provided at the end of this petition.

Maine has provided documentation indicating that the total vessel population is estimated to be 893 in the proposed area. It is estimated that 458 of the total vessel population may have a Marine Sanitation Device (MSD) of some type.

The proposed area is identified as a High Value Wildlife Habitat by the U.S. Fish and Wildlife Service. The intertidal

zone includes a diverse array of habitats that are predominately rocky shore but does include isolated areas of salt marsh and mud flats. There are 252 acres of identified shellfish habitat. There are five marinas and this area is one of the more popular tourist locations in the state. This area is a popular destination for boaters due to its natural environmental diversity and would benefit from a No Discharge Area.
