Animal Plant and Health Inspection Service

Title: Black Stem Rust; Identification Requirements and Addition of Rust-Resistant Varieties.

OMB Control Number: 0579–0186.

Summary of Collection: Under the Plant Protection Act (7 U.S.C. 7701—*et seq.*), the Secretary of Agriculture is authorized to prohibit or restrict the importation, entry, or movement of plants and plant products to prevent the introduction of plant pests into the United States or their dissemination within the United States. Black stem rust is one of the most destructive plant diseases of small grains that are known to exist in the United States. The disease is caused by a fungus that reduces the quality and yield of infected wheat, oat, barley, and rye crops by robbing host plants of food and water.

Need and Use of the Information: APHIS will collect information to prevent the spread of black stem rust by providing for and requiring the accurate identification of rust-resistant varieties by inspectors. Businesses that request APHIS to add a variety to the list of rust-resistant barberries, need to provide APHIS with a written description and color pictures that can be used by the State nursery inspectors to clearly identify the variety and distinguish it from other varieties. This action enables nurseries to move the species into and through protected areas and to propagate and sell the species in States or parts of States designated as protected areas.

Description of Respondents: Business or other for profit.

Number of Respondents: 4.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 32.

Title: Pine Shoot Beetle Host Material from Canada.

OMB Control Number: 0579–0257.

Summary of Collection: Under the Plant Protection Act (7 U.S.C. 7701–7772), the Secretary of Agriculture is authorized to prohibit or restrict the importation, entry, or movement of plants and plant pests to prevent the introduction of plant pests into the

United States or their dissemination within the United States. The Animal Plant and Health Inspection Service (APHIS) foreign quarantine regulations restrict the importation of pine shoot beetle host material into the United States from Canada. Pine shoot beetle (PSB) is a pest of pine trees. It can cause damage in weak and dying trees where reproductive and immature stages of PSB occur, and in the new growth of healthy trees. PSB can damage urban ornamental trees and can cause economic losses to the timber, Christmas trees, and nursery industries.

Need and Use of the Information: APHIS will collect the information using Compliance Agreements, Written Statements, and Canadian Phytosanitary Certificates to protect the United States from the introduction of pine shoot beetle and other plant diseases.

Description of Respondents: Business or other for profit; Federal Government.

Number of Respondents: 2,340.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 94.

Agricultural Research Service

Title: Supplemental Nutrition Assistance Program Education Connection Resource Sharing Form

OMB Control Number: 0518–0031

Summary of Collection: In 2001, the United States Department of Agriculture's (USDA) Food and Nutrition Service established the Food Stamp Nutrition Connection to improve access to the Food Stamp Program Education resources. In 2008, the Web site was renamed to the Supplemental Nutrition Assistance Program Education (SNAP-Ed) Connection. The Web site is developed and maintained at the National Agricultural Library's (NAL) Food and Nutrition Information Center (FNIC). The SNAP-Ed Connection is a resource Web site for SNAP-Ed administrators and educators. SNAP-Ed personnel use the SNAP-Ed Connection Web site to locate curricula, participant materials, nutrition research, administrative documents, and information regarding SNAP-Ed program development, implementation and evaluation. The authority for NAL to collect this information is contained in the CFR, Title 7, Volume 1, Part 2, Subpart K, Sec. 2.65 (92).

Need and Use of the Information: SNAP-ED Connection staff members use information collected by the Resource Sharing Form to build and constantly enhance the online database of nutrition education and training

materials known as the Resource Finder Database. SNAP-Ed providers access and use the database to identify and obtain curricula, lesson plan, research, training tools and participant materials. Vital information about these resources, such as a description of the resource, its creator, publisher and ordering information is collected using the Resource Sharing Form. Failure to collect this information would significantly inhibit SNAP-Ed Connection ability to provide up-to-date information on existing nutrition education materials that are appropriate for SNAP-Ed programs and providers.

Description of Respondents: Business or other for-profit; Not-for-profit institutions; State, Local or Tribal Government.

Number of Respondents: 170.

Frequency of Responses: Reporting: On occasion.
