Proposed Project

Assessment of a Comprehensive Human Immunodeficiency Virus (HIV) Clinic-Based Intervention to Promote Patients' Health and Reduce Transmission Risk—New—National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention (NCHHSTP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

This research is funded by the CDC and the National Institute of Mental Health (NIMH). The purpose of the project is to implement and evaluate an HIV clinic-based intervention, the goals of which are to increase the percentage of patients who have an undetectable viral load, who are adherent to antiretroviral therapy (ART), who attend clinic regularly for primary care, and practice safer sexual behaviors. Realizing these goals will promote HIV patients' health and reduce risk of transmitting HIV to others. These are objectives of the National HIV/AIDS Strategy and goals of the strategic plan of the Division of HIV/AIDS Prevention, Centers for Disease Control and Prevention.

The project will be conducted at six university-affiliated HIV clinics in the United States: (1) Baylor College of Medicine, Houston, (2) Boston Medical
