

person receives a notice of violation, the person has 30 days from the date the notice was received to object by submitting to the Federal land manager documentation to support the position that the person did not commit a violation or that the proposed penalty should be reduced or eliminated.

Proposed Revisions

With this submission, we propose to revise the following currently approved information collections:

(1) *DI Form 9002, "Paleontology Permit Application"* (43 CFR 49.115)—New fields proposed:

- a. Provide State or administrative area (*i.e.*, forest or NPS unit) where proposed work will occur. This will allow DOI offices to assign local contacts to assist applicants and to track work for administrative accountability.
- b. Is the proposed work identified as hazardous? (Yes/No). For example, work in caves, with helicopters, or using high angle rigging or ropes. This will allow bureau offices to learn if an applicant's proposed work might be identified as hazardous to either the applicant or the public.
- c. RAPTOR account creation. This field will provide electronic access to the BLM Recreation and Permit

Tracking & Online Reporting (RAPTOR) system. The information will be collected during RAPTOR account creation and then used to autofill all forms. This additional burden hours expended while setting up a RAPTOR account will be offset by the autofill feature of the system. Applicants who are unable to use the RAPTOR system will continue to use the original DI 9002 format.

(2) *DI Form 9004, "Paleontology Locality Record"* (43 CFR 49.125(a)(1) & (6))—The original DI 9004 form will remain unchanged, but BLM proposes an additional format that allows permittees to report multiple localities in a single spreadsheet. Applicants requested the capability for a single spreadsheet upload which has proven to expedite data submission for permittees while also reducing administrative burden to the bureau.

(3) *DI Form 9007, Repository Receipt* (43 CFR 49.125(a)(10) & (11))—We are not proposing changes to the currently approved fields on the DI 9007; however, we plan to update the instructions to state that permittees may substitute this form with a copy of the approved repository's museum accession record. This record, provided by the repository, follows a museum best practice and industry standard and so may be submitted in place of DI 9007 in order to reduce duplication of effort.
