**FEDERAL MARITIME COMMISSION**

[Docket No. 20–09]

**MAC Industries, Inc. d/b/a MAC Container Line, Complainant v. COSCO SHIPPING Lines Co., Ltd., Respondent; Notice of Filing of Complaint and Assignment**

Served: June 9, 2020.

Notice is given that a complaint has been filed with the Federal Maritime Commission (Commission) by MAC Industries, Inc. d/b/a MAC Container Line, hereinafter “Complainant”, against COSCO SHIPPING Lines Co., Ltd., hereinafter “Respondent”. Complainant states that it “is a non-vessel-operating common carrier (“NVOCC”)” and is principally located in California. Complainant states that Respondent is an ocean common carrier and controlled carrier of The Peoples Republic of China.

Complainant claims it “has shipped pursuant to COSCO service contracts between 8,000 and 12,000 TEUs annually since 2016, to the present, and as a result of these volumes MAC has earned a VIP Partner status with COSCO since 2013.” Complainant alleges that in late February 2020, Respondent intended to unilaterally amend service

contract rates in violation of 46 U.S. Code 41104 (a) (2)(A) and 46 CFR 530.10(a)(1) “requir[ing] that an amendment to a service contract ‘. . . [have] prospective effect and . . . [be] mutually agreed upon by the service contract parties.’” Complainant claims that it communicated to Respondents “that it would accept the rate increases prospectively from on or about February 28, 2020, provided that [Respondent] agreed to withdraw the unlawful retroactive charges which [Respondent] had unilaterally and unlawfully initiated.” Complainant further alleges that Respondent “has taken retaliatory steps against MAC in response to the complaint” including limiting its VIP Partner benefits.

Complainant alleges that Respondent violated 46 U.S.C. 41104 (a)(3). Complainant alleges it has suffered “financial damages of at least \$1,000,000 as a direct result of Respondents’ repeated violations of 46 U.S.C. 8 § 41104(a)(3)” and seeks reparations and other relief.

The full text of the complaint can be found in the Commission’s Electronic Reading Room at <https://www2.fmc.gov/readingroom/proceeding/20-09/>.

This proceeding has been assigned to Office of Administrative Law Judges. The initial decision of the presiding office in this proceeding shall be issued by June 9, 2021, and the final decision of the Commission shall be issued by December 9, 2021.

**Proposed Project**

**AHRQ Managing Unhealthy Alcohol Use in Primary Care Initiative**

The Affordable Care Act established the Patient-Centered Outcomes Research Trust Fund (PCORTF) and authorized AHRQ to broadly disseminate the research findings published by the Patient-Centered Outcomes Research Institute (PCORI) and other government-funded research relevant to comparative clinical effectiveness research. AHRQ’s PCORTF-funded initiative identifies research findings that could significantly improve patient outcomes through broader implementation in clinical practice. Under this initiative, in 2019 AHRQ launched a new initiative, Managing Unhealthy Alcohol Use in Primary Care, in order to promote the uptake of evidence-based practices for unhealthy alcohol use (UAU). As part of this initiative, AHRQ selected six grantees and funded a contractor to support and evaluate the grantees. The grantees will collectively work with more than 700 primary care practices over three years to implement and evaluate strategies to increase the use of evidence-based interventions such as screening for unhealthy alcohol use, brief interventions for adult patients who drink too much, and medication-assisted therapy (MAT) for patients with an alcohol use disorder. The contractor will develop a resource center, convene a technical expert panel, conduct an ongoing environmental scan, support a learning community of grantees, and complete a multisite, mixed methods evaluation.

Unhealthy alcohol use, defined as behaviors ranging from risky drinking to alcohol use disorders (AUD), is estimated to be the third leading cause of preventable death in the United States. Between 2006 and 2010, nearly one in ten deaths were alcohol-related. In addition to early mortality, UAU is associated with a host of adverse outcomes, including unintentional injuries and the development or exacerbation of a range of physical and behavioral health conditions. The Centers for Disease Control and Prevention estimates suggest that excessive alcohol consumption costs the United States \$249 billion annually.

Under the UAU initiative, six AHRQ grantees will work to improve the management of UAU in primary care by disseminating and implementing evidence-based practices for screening and brief intervention, referral to treatment (SBI/RT), and MAT in primary care practices. The multi-site, mixed-methods evaluation will include primary data collection by the evaluator,
