

the pediatric audiology facilities are located. This survey will continue to allow CDC-EHDI team and state EHDI programs to compile a systematic, quantifiable distribution of audiology facilities and the capacity of each facility to provide services for children age 5 and younger. The data collected will also allow the CDC-EHDI team to analyze facility distribution data to improve technical assistance to State EHDI programs.

Two additional questions will be added to the existing survey. The two questions will ask for more information from audiology facilities that provide services by remote telepractice technology. This information will be of vital interest and benefit for both parents who live in remote regions of the US and state EHDI programs to maximize resource coverage.

Respondents will all be audiologists who manage a facility or provide audiologic care for children age 5 and younger. To minimize burden and improve convenience, the survey will continue to be available via a secure password protected Web site. Placing the survey on the internet ensures convenient, on-demand access by the audiologists. Financial cost is minimized because no mailing fee will be associated with sending or responding to this survey.

EHDI-PALS currently has 892 facilities in the database since the beginning of the data collection. All 892 facilities' contacts will receive a brief email from the University of Maine to remind them to review their survey answers. It is estimated that approximately 800 audiologists will do so.

It takes approximately nine minutes per person to review the survey answers. Both the American Speech-Language-Hearing Association (ASHA) and American Academy of Audiology (AAA) are members of the EHDI-PALS workgroup and will continue to disseminate a request through association e-newsletters and e-announcements to all audiologists who provide services to children younger than 5 years of age to complete the EHDI-PALS survey. It is estimated that, potentially, an additional 400 new audiologists will complete the revised survey, which will take approximately nine minutes per respondent. The nine minutes calculation is based on a previous timed pre-test with six volunteer audiologists.

There are no costs to respondents other than their time. The total estimated annual burden hours are 180.

ESTIMATES OF ANNUALIZED BURDEN HOURS

Respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
Audiologists who have completed survey.	Annual Survey Review	800	1	9/60
New Audiologists	Revised Survey	400	1	9/60

Leroy A. Richardson,

Chief, Information Collection Review Office, Office of Scientific Integrity, Office of the Associate Director for Science, Office of the Director, Centers for Disease Control and Prevention.

[30-Day-14-0881]

Agency Forms Undergoing Paperwork Reduction Act Review; Data Calls for the Laboratory Response Network; Cancellation

AGENCY: Centers for Disease Control and Prevention (CDC), National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), Department of Health and Human Services (HHS).

ACTION: Notice cancellation.

SUMMARY: The Centers for Disease Control and Prevention is cancelling the 30-Day Information Collection Request, 14-0881, concerning the *Data Calls for the Laboratory Response Network* (79 FR 4165), published January 24, 2014.

The purpose behind this notice cancellation is that a 60-day FRN was previously published on December 2, 2013 (78 FR 27087). The public must have 60 days to provide comment to the agency's 60-day FRN. The agency should not publish a 30-day FRN until all public comments have been received.

DATES: The 30-day FRN published on January 24, 2014 at 79 FR 4165 is withdrawn as of January 27, 2014. FOR FURTHER INFORMATION CONTACT: (404) 639-7570 or send comments to CDC: LeRoy Richardson, 1600 Clifton Road, MS D-74, Atlanta, GA 30333 or send an email to omb@cdc.gov.

LeRoy A. Richardson,

Chief, Information Collection Review Office, Office of Scientific Integrity, Office of the Associate Director for Science, Office of the Director, Centers for Disease Control and Prevention.

Meeting of the Community Preventive Services Task Force (Task Force)

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice of meeting.

SUMMARY: The Centers for Disease Control and Prevention (CDC) announces the next meeting of the Community Preventive Services Task Force (Task Force). The Task Force is an independent, nonfederal, and uncompensated panel. Its members represent a broad range of research, practice, and policy expertise in prevention, wellness, health promotion, and public health, and are appointed by the CDC Director. The Task Force was convened in 1996 by the Department of Health and Human Services (HHS) to identify community preventive programs, services, and policies that increase healthy longevity, save lives and dollars and improve Americans' quality of life. CDC is mandated to provide ongoing administrative, research, and technical support for the
