

198,261 hours, due to updating the estimated number of certified applicators and handlers potentially involved in soil fumigation activities. There is also an increase in burden from 0 to 952,635 hours due to the Agency's inclusion of certain non-soil fumigant risk mitigation activities. These changes are the result of a program adjustment.

displays a currently valid OMB control number.

Abstract: The Microbial Rules Renewal ICR examines public water system and primacy agency burden and costs for recordkeeping and reporting requirements in support of the microbial drinking water regulations. These recordkeeping and reporting requirements are mandatory for compliance with 40 CFR parts 141 and 142. The ICR includes the following microbial regulations: The Surface Water Treatment Rule (SWTR), the Total Coliform Rule (TCR), the Revised Total Coliform Rule (RTC), the Interim Enhanced Surface Water Treatment Rule (IESWTR), the Filter Backwash Recycling Rule (FBRR), the Long Term 1 Enhanced Surface Water Treatment Rule (LT1ESWTR), the Long Term 2

Enhanced Surface Water Treatment Rule (LT2ESWTR), the Ground Water Rule (GWR), and the Aircraft Drinking Water Rule (ADWR). Future microbial-related rulemakings will be added to this consolidated ICR after the regulations are promulgated and the initial, rule-specific ICRs are due to expire.

Form Numbers: None.

Respondents/affected entities: Public water systems and primacy agencies.

Respondent's obligation to respond: Mandatory for compliance with 40 CFR parts 141 and 142.

Estimated number of respondents: 146,808 (total).

Frequency of response: Varies by requirement (*i.e.*, on occasion, monthly, quarterly, semi-annually, and annually).

Total estimated burden: 18,127,581 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$972,102,000 (per year), includes \$228,972,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an increase of 3,443,983 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This is due to full implementation of the Revised Total Coliform Rule, as well as increased state burden associated with recordkeeping, compliance tracking, and significant deficiency and corrective action reporting for sanitary surveys at large surface water systems.

Director, Regulatory Support Division.

Abstract: EPA promulgated the generic Preliminary Assessment Information Rule (PAIR) (40 CFR part 712) under section 8(a) of the Toxic Substances Control Act (TSCA). The Frank R. Lautenberg Chemical Safety for the 21st Century Act amending TSCA was enacted on June 22, 2016; however, the authority for a TSCA section 8(a) PAIR rule was not modified. EPA uses PAIR, using the Manufacturer's Report Preliminary Assessment Information Form, to collect information to help identify, assess, and manage human health and environmental risks from chemical substances, mixtures and categories. PAIR requires chemical manufacturers and importers to complete and submit standardized information about production, use, or exposure-related data to help evaluate the potential for human health and environmental risks caused by the manufacture or importation of identified chemical substances, mixtures or categories. EPA or other federal agencies can identify chemicals for a TSCA section 8(a) PAIR expediated rulemaking that have a justifiable need for production, use, or exposure-related data. This ICR also covers certain specific chemical testing and reporting requirements under Subpart B of 40 CFR part 766 that are very similar to the PAIR requirements. The Agency rarely receives submissions of the information required by 40 CFR 766. The dibenzo-para-dioxin/dibenzofuran regulations at 40 CFR part 766 require that any person who manufactures, imports, or processes a chemical substance listed at 40 CFR 766.25 test that chemical substance and submit appropriate information to EPA. Persons who commence manufacture, import, or processing of a chemical substance listed at 40 CFR 766.25, must submit a letter of intent to test or an exemption application within 60-days of starting any of those activities. Each person who is manufacturing or processing a chemical listed in 40 CFR 766.25, must submit a protocol for testing. Persons who manufacture or import a chemical substance listed under 40 CFR 766.25 must report positive test results, using
