The AP will also reconsider its recommendations from an October 2011 meeting on vermilion snapper annual catch limits in light of revised analysis and new acceptable biological catch recommendations from the Scientific and Statistical Committee. In addition, the AP will review updated information on fish venting and recompression, and may consider recommendations for changes to the current regulations requiring possession and use of venting tools when fishing for reef fish.

SUPPLEMENTARY INFORMATION: The Gulf of Mexico Fishery Management Council will convene Public Hearings on a proposed generic amendment addressing Federal seafood dealer permits. A seafood dealer is the person who first receives fish by way of purchase, barter, or trade. Seafood dealers buy product from commercial fishermen and sell directly to restaurants, markets, other dealers, processors, or consumers without substantially altering the product. NOAA Fisheries Service issues Federal dealer permits on an annual basis to those individuals or organizations that wish to become a seafood dealer. The Gulf Council is considering changes the current permit and reporting requirements for those individuals or organizations that purchase species managed by the Gulf of Mexico and South Atlantic Councils to ensure landings of managed fish stocks are recorded accurately and in a timely manner so annual catch limits are not exceeded. Modification of fishery management plans would affect species managed solely by the Gulf of Mexico Council or the South Atlantic Councils, as well as species managed by both Councils.
