

consisting of chain link, steel wire mesh, or other steel materials that are not more than 10 millimeters in actual diameter or width. The steel tubing may surround all edges of the temporary steel fence panel or only be attached along two parallel sides of the panel. All temporary steel fence panels with at least two framed sides are covered by the scope, regardless of the number of edges framed with steel tubing.

Temporary steel fence panels are typically between 10 and 12 feet long and six to eight feet high, though all temporary steel fence panels are covered by the scope regardless of dimension or weight as long as a single panel is over six square feet in actual surface area and weighs more than four pounds.

Temporary steel fence panels may be square, rectangular, or have rounded edges, and may or may not have gates, doors, wheels, or barbed wire or other features, though all temporary steel fence panels are covered by the scope regardless of shape and other features. Temporary steel fence panels may have one or more horizontal, vertical, or diagonal reinforcement tubes made of steel welded to the inside frame, though all temporary steel fence panels are covered by the scope regardless of the existence, number, or type of reinforcement tubes attached to the panel. Temporary steel fence panels may have extensions, pins, tubes, or holes at the bottom of the panel, but all temporary steel fence panels are covered regardless of the existence of such features.

Steel fence stands are shapes made of steel that stand flat on the ground and have one or two open tubes or solid pins into which temporary steel fence panels are inserted to stand erect. The steel fence stand may be made of welded steel tubing or may be a flat steel plate with one or two tubes or pins welded onto the plate for connecting the panels.

Temporary steel fencing is covered by the scope regardless of coating, painting, or other finish. Both temporary steel fence panels and temporary steel fence stands are covered by the scope, whether imported assembled or unassembled, and whether imported together or separately.

Subject merchandise includes material matching the above description that has been finished, assembled, or packaged in a third country, including by coating, painting, assembling, attaching to, or packaging with another product, or any other finishing, assembly, or packaging operation that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the temporary steel fencing.

Temporary steel fencing is included in the scope of this investigation whether or not imported attached to, or in conjunction with, other parts and accessories such as posts, hooks, rings, brackets, couplers, clips, connectors, handles, brackets, or latches. If temporary steel fencing is imported attached to, or in conjunction with, such non-subject merchandise, only the temporary steel fencing is included in the scope.

Merchandise covered by this investigation is currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under the subheading 7308.90.9590. Subject

merchandise may also enter under subheadings 7326.90.8688 and 7323.99.9080 of the HTSUS. The HTSUS subheadings set forth above are provided for convenience and U.S. Customs purposes only. The written description of the scope is dispositive.

Glycine From Japan: Notice of Amended Final Results of Antidumping Duty Administrative Review Pursuant to Settlement; 2018–2020

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) is issuing these amended final results pursuant to a settlement agreement with Nagase & Co., Ltd. (Nagase) with respect to the final results of the administrative review of glycine from Japan during the period of review (POR) October 31, 2018, through May 31, 2020.

DATES: Applicable February 11, 2025.

FOR FURTHER INFORMATION CONTACT: John K. Drury, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–0195.

SUPPLEMENTARY INFORMATION:

Background

On September 29, 2021, Commerce published the final results of the 2018–2020 administrative review of the antidumping duty (AD) order on glycine from Japan.¹ In the *Final Results*, Commerce calculated a weighted-average dumping margin of 27.71 percent for Nagase for the POR.²

Following the publication of the *Final Results*, Nagase filed a lawsuit with the U.S. Court of International Trade (CIT) challenging certain aspects of Commerce's *Final Results*, including: (1) Commerce's inclusion of certain research and development (R&D) expenses unrelated to Nagase's costs of

producing glycine; (2) Commerce's inclusion of compensation for payment expenses; and (3) Commerce's refusal to modify the importer-specific AD assessment rate calculated for Nagase's affiliated importer. On April 11, 2023, the CIT sustained, in part, and remanded, in part, Commerce's final results.³ Commerce filed its remand redetermination on August 9, 2023. In its remand redetermination, Commerce modified its treatment of the R&D expenses at issue and made no changes to its calculation methodology of the importer-specific AD assessment rate for Nagase's affiliated importer.⁴ The CIT sustained Commerce's redetermination on July 30, 2024.⁵ On October 2, 2024, Nagase appealed the decision to the U.S. Court of Appeals for the Federal Circuit (Federal Circuit).

On January 30, 2025, the United States and Nagase entered into an agreement to settle this dispute. Pursuant to the terms of settlement, the parties have agreed to a final assessment as discussed below. The Federal Circuit issued its order dismissing the appeal on February 3, 2025.⁶

Assessment Rates

Consistent with the settlement agreement and the order of dismissal, issued on February 3, 2025, Commerce will instruct U.S. Customs and Border Protection (CBP) to liquidate all unliquidated entries produced by Yuki Gosei Kogyo Co., Ltd., exported by Nagase, and imported by Nagase America LLC or Nagase America Corporation at the rate at which cash deposits were collected at the time of entry during the 2018–2020 period of review and otherwise to liquidate entries of glycine produced by Yuki Gosei Kogyo Co., Ltd., exported by Yuki Gosei Kogyo Co., Ltd. or Nagase, and imported by an unaffiliated importer (i.e., an importer other than Nagase America LLC or Nagase America Corporation) at the importer-specific assessment rate determined by Commerce in the *Final Results*.

Pursuant to section 751(a)(2)(C) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.212(b)(1), Commerce has determined, and CBP shall assess, antidumping duties on all appropriate

entries of subject merchandise in accordance with these revised final results of review.

Cash Deposit Requirements

Because Nagase has a superseding cash deposit rate, *i.e.*, there have been final results published in a subsequent administrative review, we are not revising the cash deposit rate and will not issue revised cash deposit instructions to CBP.

Notification to Interested Parties

We are issuing this determination and publishing these amended final results and notice in accordance with section 516(a)(e) of the Act.
