Abstract: The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 63, subpart A, and any changes, or additions to the General Provisions specified at 40 CFR part 63, subpart R.

Owners or operators of the affected facilities must submit initial notification reports, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required semiannually at a minimum.

Form Numbers: None.

Respondents/affected entities: Owners or operators of gasoline distribution facilities that transfer and store gasoline, including pipeline breakout stations and bulk terminals.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart R).

Estimated number of respondents: 492 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 15,823 hours (per year). "Burden" is defined at 5 CFR 1320.3(b).

Total estimated cost: \$1,904,020 (per year), includes \$357,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the respondent burden in this ICR compared to the previous ICR. The increase occurred due to an increase in the total estimated number of area sources, 25 percent of which are within the 50 percent major source threshold criteria and are affected by this standard. This ICR uses updated estimates to more accurately reflect the respondent universe, and to be consistent with EPA ICR Number 2237.03. This ICR also uses updated labor rates from the Bureau of Labor Statistics to calculate burden costs.

John Moses,

Director, Collection Strategies Division.

Abstract: EPA would like to continue collecting notifications from gasoline retailers and wholesale purchaser-consumer related to commingling of ethanol blended and non-ethanol blended reformulated gasoline. The test results will allow EPA to monitor compliance with the Reformulated Gasoline Commingling Provisions. We inform respondents that they may assert claims of business confidentiality (CBI) for information they submit in accordance with 40 CFR part 2.203.

Form Numbers: None.

Respondents/affected entities: Gasoline stations, Gasoline stations with convenience stores, Gasoline stations without convenience stores.

Respondent's obligation to respond: Mandatory under the Clean Air Act (CAA), 42 U.S.C. §§ 7414 and 7542.

Estimated number of respondents: 43,050.

Frequency of response: Annually.

Total estimated burden: 21,013 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$357,221 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in Estimates: The change in burden from the prior ICR is due in part to better numbers extracted from business and industry economic statistics that assisted in calculating the numbers of respondents. These better numbers reduced the party size by 13,650 members. The number of responses also declined from 110,700 to 84,050 a difference of 26,650 reports, which reduced the industry burden hours from 27,675 to 21,013. We also found that the original cost per response was overstated by a factor of 2. With the decline of respondents, burden hours and responses, and revision of the cost per response, the cost associated with this ICR is \$357,221, a difference of
