In the comparison study component, information is collected at intake, 6 months, 12 months, 24 months, and annually thereafter. In both studies, data were collected annually from grantees' administrators and providers.

SAMHSA's Center for Mental Health Services (CMHS) is seeking OMB approval for a 4-month extension of approval for the comparison study of this evaluation of integrated child mental health service systems funded by CMHS to allow sufficient follow-up data to be collected. Flint Hills National Wildlife Refuge will continue to conserve habitat for the diverse array of native plants and animals that rely upon the resources of the Refuge for survival. This Plan describes the conservation activities that the Fish and Wildlife Service intends to carry out on Flint Hills NWR and other areas of the Neosho watershed.
