DEPARTMENT OF ENERGY

[FE Docket No. PP-230]

Application to Rescind Presidential Permit; Joint Application for Presidential Permit; Detroit Edison Company and International Transmission Company

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of joint application.

SUMMARY: Detroit Edison and International Transmission jointly applied to rescind Presidential Permit PP-221 held by Detroit Edison and to issue a Presidential permit to International Transmission covering these same international transmission facilities. In addition, the Applicants are requesting expedited approval of their joint application.

DATES: Comments, protests, or requests to intervene must be submitted on or before September 21, 2000.

ADDRESSES: Comments, protests, or requests to intervene should be addressed as follows: Office of Coal & Power Import and Export (FE-27), Office of Fossil Energy, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC, 20585-0350.

FOR FURTHER INFORMATION CONTACT: Ellen Russell (Program Office) 202-586-9624 or Michael T. Skinker (Program Attorney) 202-586-2793.

SUPPLEMENTARY INFORMATION: The construction, operation, maintenance and connection of facilities at the international border of the United States for the transmission of electric energy between the United States and a foreign country is prohibited in the absence of a Presidential permit issued pursuant to Executive Order (EO) 10485, as amended by EO 12038. Existing Presidential permits are not transferable or assignable. However, in the event of a proposed voluntary transfer of facilities, in accordance with the regulations at 10 CFR 205.323, the existing permit holder and the

transferee are required to file a joint application with DOE that includes a statement of reasons for the transfer.

On August 21, 2000, The Detroit Edison Company (Detroit Edison) and International Transmission Company (International Transmission) (collectively the "Applicants") jointly filed an application with the Office of Fossil Energy (FE) of the Department of Energy (DOE) for a transfer from Detroit Edison to International Transmission of the facilities authorized by Presidential Permit PP-221. These facilities include:

(a) One 230,000-volt (230-kV) transmission line connecting Detroit Edison's Bunce Creek Station, located in Marysville, Michigan, with Ontario Hydro's Scott Transformer Station located in Sarnia, Ontario (previously identified by Detroit Edison as the B3N facility).

(b) One 230-kV transmission line connecting Detroit Edison's Waterman Station, located in Detroit, Michigan, with Ontario Hydro's J. Clark Keith Generating Station, located in Windsor, Ontario (previously identified by Detroit Edison as the J5D facility).

(c) One 345-kV transmission line connecting Detroit Edison's St. Clair Generating Station, located in East China Township, Michigan, with Ontario Hydro's Lambton Generating Station, located in Moore Township, Ontario (previously identified by Detroit Edison as the L4D facility).

(d) One 230-kV transmission line connecting Detroit Edison's St. Clair Generating Station, located in East China Township, Michigan, with Ontario Hydro's Lambton Generating Station, located in Moore Township, Ontario (previously identified by Detroit Edison as the L51D facility).

The proposed transfer of these facilities is occasioned by a planned corporate restructuring by DTE Energy Company (DTE Energy); the Applicants are each wholly owned subsidiaries of DTE Energy. On June 29, 2000, in an Order issued by the Federal Energy Regulatory Commission (FERC) in Docket No. EC00-86-000, DTE Energy and the Applicants were authorized to engage in a series of intra-corporate transactions. One result of these transactions is the transfer from Detroit Edison to International Transmission of ownership, operation, and control of its integrated high-voltage transmission facilities, including international transmission lines previously authorized to Detroit Edison by DOE in Presidential Permit PP-221. The PP-221 facilities connect the Detroit Edison system with the system of Hydro One Networks, Inc. (Hydro One, formerly Ontario Hydro).
