

The methodology, publication dates, burden and data collection plan do not change as result of these program changes. The changes to these surveys will not affect burden hours.

Included with this change request are (1) Addition of the Arizona Enterprise Version of the Vegetable Chemical Use Survey that should have been added earlier, and

(2) One version of the ARMS 2 Wheat Production Practices Report. The one version will be used in lieu of three versions (winter, Durum, and other spring wheat) submitted earlier.

Need and Use of the Information: ARMS is the only annual source of whole farm information available for objective evaluation of many critical issues related to agriculture and the rural economy. This issues that will be addressed in this request are: input usage, production practices, and chemical use. Without these data, decision makers cannot analyze and report on critical issues that affect farms and farm households when pesticide regulatory actions are being considered.

Description of Respondents: Farms; Business or other for-profit.

Number of Respondents: 416,150.

Frequency of Responses: Reporting: Quarterly; Semi-annually; Monthly; Annually.

Total Burden Hours: 52,147.

Levi S. Harrell,

Departmental Information Collection Clearance Officer.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104-13. Comments are required regarding; whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological

collection techniques or other forms of information technology.

Comments regarding this information collection received by June 17, 2024 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Farm Service Agency

Title: Volunteer Programs.

OMB Control Number: 0560-0232.

Summary of Collection: Section 1526 of the Food and Agriculture Act of 1981 (7 U.S.C. 2272) permits the Secretary of Agriculture to establish a program to use volunteers to perform a wide range of activities to carry out the programs of or supported by the Department of Agriculture (USDA). Each USDA agency is granted the authority to establish programs designed to provide educationally related work assignments for students in non-pay status. USDA, Departmental Regulation 4230-1 requires documentation of service performed without compensation by persons who do not receive Federal appointment. For this requirement, the information collection request is necessary to continue implementation of the programs, which allows the Farm Service Agency (FSA) and Risk Management Agency (RMA) to use volunteers to perform a wide range of activities to carry out the programs of or supported by the Agency.

Need and Use of the Information: Applicants who are accepted in the program will complete the "Service Agreement and Attendance Record." FSA and RMA will use the reported information to respond to request for information on volunteers from the USDA Office of Human Resources Management. FSA Human Resource is responsible for determining how to document volunteer appointments. If the information were not collected for each volunteer, FSA and RMA would be unable to document service performed

without compensation by persons in the program if this information were not collected for each volunteer.

Description of Respondents:

Individuals or households.

Number of Respondents: 20.

Frequency of Responses: Reporting: Annually.

Total Burden Hours: 20.

Rachelle Ragland-Greene,

Acting Departmental Information Collection Clearance Officer.

Animal and Plant Health Inspection Service

[Docket No. APHIS-2023-0079]

Spotted Lanternfly Cooperative Control Program; Programmatic Environmental Assessment and Finding of No Significant Impact

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that the Animal and Plant Health Inspection Service has prepared a programmatic environmental assessment and finding of no significant impact relative to the Spotted Lanternfly Cooperative Control Program in the conterminous United States. The environmental assessment documents our review and analysis of environmental impacts associated with the Spotted Lanternfly Cooperative Control Program. Based on its finding of no significant impact, the Animal and Plant Health Inspection Service has determined that an environmental impact statement need not be prepared.

FOR FURTHER INFORMATION CONTACT: Mr. Matthew Travis, Spotted Lanternfly National Policy Manager, PPQ, APHIS, Emergency and Domestic Programs, 4700 River Road, Unit 133, Riverdale, MD 20737-1238; telephone: (580) 240-5394; email: Matthew.A.Travis@usda.gov.

SUPPLEMENTARY INFORMATION:

Background

The spotted lanternfly (SLF), *Lycorma delicatula*, an invasive species native to Asia, is a destructive pest that in large numbers can cause significant damage to critical habitat and economically important plants. The U.S. Department of Agriculture, Animal and Plant Health Inspection Service (APHIS) proposed to control SLF to slow the spread of this
