

(7) *Unlimited Deduction of Overseas Entertainment Expense*

Under Article 18-2 of the Corporation Tax Act and supporting legislation, entertainment expenses for domestic clients and foreign clients are eligible to be deducted from taxable income. The amount that can be deducted for domestic entertainment expenses is subject to a ceiling according to an established formula and depending on the amount of any overseas entertainment expenses claimed. There is no cap on overseas entertainment expenses. Because entertainment expense deductions are unlimited only for overseas clients, this program confers benefits which constitute export subsidies, to the extent that the overseas expenses claimed are greater than those which would have been allowed using the domestic cap formula. In the investigation, the Department determined a subsidy rate of less than 0.005 percent for both certain cold-rolled and certain corrosion-resistant carbon steel flat products.

(7) *Reserve for Investment*

This reserve fund program operates in the same manner as reserves for export loss and overseas market development described above. However, because this program provides benefits only to those industries that use certain production facilities outside of metropolitan Seoul, this program is a regional subsidy. In the investigation, the Department determined subsidy rates of 0.03 percent and 0.02 percent for certain cold-rolled and certain corrosion-resistant carbon steel flat products, respectively.

(8) *Duty Drawback*

The Government of Korea establishes an authorized loss rate for raw materials used in the manufacture of exported goods. Duty drawback includes the amount of duty remitted on the authorized loss or wastage for the raw materials. Duty drawback for loss or wastage only becomes countervailable when the allowance for this loss or wastage is unreasonable or excessive. Here, we found the duty drawback was not excessive and, therefore, was not countervailable with regard to POSCO. However, Union Steel was found to benefit from this program. The Department, therefore, calculated estimated net subsidies of 0.01 percent for both certain cold-rolled and corrosion carbon steel flat products.

(9) *Preferential Utility Rates*

In the investigation, the Department determined that countervailable benefits were provided to the steel industry with respect to certain discounts applied to

electricity charges for certain firms. The Department determined subsidy rates of 0.03 percent and 0.02 percent for certain cold-rolled and certain corrosion-resistant carbon steel flat product, respectively.

(10) *Short-Term Export Financing*

The Department determined that during the period of investigation, Pohang Coated Steel Company ("POCOS"), was the only respondent to receive short-term loans contingent on exports. The calculated estimated net *ad valorem* subsidies was less than 0.005 percent for both certain cold-rolled and corrosion-resistant carbon steel flat products.

This notice also serves as the only reminder to parties subject to administrative protective orders ("APO") of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305 of the Department's regulations. Timely notification of the return or destruction of APO materials or conversions to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

We are issuing and publishing these determinations and notice in accordance with sections section 751(c), 752, and 777(i) of the Act.
