

## Appendix C—Glossary

**Services Research:** Examines how people get access to health care, how much care costs, and what happens to patients as a result of this care. The main goals of health services research are to identify the most effective ways to organize, manage, finance, and deliver high quality care; reduce medical errors; and improve patient safety. Examples include research on the organization, financing, and delivery of health services, outcomes and cost-effectiveness research.

**Biomedical Research:** Examines the biological underpinnings of disease etiology, prevention, and treatment. Examples include basic science and clinical trials.

**Cost-Sharing or Matching:** Cost-sharing refers to the value of allowable non-Federal contributions toward the allowable costs of a Federal grant project or program. Such contributions may be cash or in-kind contributions. For SAMHSA grants, cost-sharing or matching is not required, and applications will not be screened out on the basis of cost-sharing. However, applicants often include cash or in-kind contributions in their proposals as evidence of commitment to the proposed project. This is allowed, and the information may be considered by reviewers in evaluating the quality of the application.

**Grant:** A grant is the funding mechanism used by the Federal Government when the principal purpose of the transaction is the transfer of money, property, services, or anything of value to accomplish a public purpose of support or stimulation authorized by Federal statute. The primary beneficiary under a grant or cooperative agreement is the public, as opposed to the Federal Government.
