POLICY JUSTIFICATION

Mexico—UH-60M Black Hawk Helicopters

The Government of Mexico has requested a possible sale of three UH-60M Black Hawk helicopters in standard USG configuration, with designated unique equipment, Government Furnished Equipment (GFE), six T700-GE-701D Engines, six H-764G Embedded Global Positioning System/Inertial Navigation Systems (EGIs), six M134 7.62mm Machine Guns, three Star Safire III Forward Looking Infrared Radar Systems, three Aviation Mission Planning Systems, twelve AN/AVS-9 Night Vision Goggles, and one Aviation Ground Power Unit. Also included are spare and repair parts, support equipment, communication equipment, facility construction, air worthiness support, publications and technical documentation, personnel training and training equipment, warranties, U.S. Government and contractor technical, engineering, and logistics support services, and other related element of logistics and program support. The estimated cost is \$110 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to

improve the security of a strategic partner. Mexico has been a strong partner in combating organized crime and drug trafficking organizations. The sale of these UH-60M helicopters to Mexico will significantly increase and strengthen its capability to provide in-country airlift support for its forces engaged in counter-drug operations.

Mexico intends to use these defense articles and services to modernize its armed forces and expand its existing naval/maritime support in its efforts to combat drug trafficking organizations.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractors will be the Sikorsky Aircraft Company in Stratford, Connecticut; and General Electric Aircraft Company (GEAC) in Lynn, Massachusetts. There are no known offset agreements in connection with this potential sale.

Implementation of this proposed sale may require the assignment of one additional U.S. Government representative and one contractor representative in country full-time to support the delivery and training for approximately two years.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 15-04

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

It will be used to enhance night flying and provide a level of safety for passengers during night flights.

6. (U) If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures or equivalent systems which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.
